# CAUTIONS

## Caution label on the machine

The label  $(\bigwedge \ )$  in the fusing area of the machine indicates the following:  $\bigwedge$ : Caution, risk of danger  $\bigwedge$ : Caution, hot surface

## Cautions on using the machine

Follow the cautions below when using this machine.

## Warning:

- The fusing area is hot. Exercise care in this area when removing misfed paper.
- Do not look directly at the light source. Doing so may damage your eyes.

## () Caution:

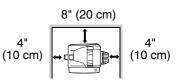

- Place the machine on a firm, level surface.
- Do not install the machine in a humid or dusty location.
- When the machine is not used for a long time, for example during prolonged holidays, turn the power switch off and remove the power cord from the outlet.
- When moving the machine, be sure to turn the power switch off and remove the power cord from the outlet.
- Do not switch the machine rapidly on and off. After turning the machine off, wait 10 to 15 seconds before turning it back on.
- Do not cover the machine with a dust cover, cloth or plastic film while the power is on. Doing so may prevent heat radiation, damaging the machine.
- Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.
- The socket-outlet shall be installed near the machine and shall be easily accessible.

# Important points when selecting an installation site

#### Do not install your machine in areas that are:

- · damp, humid, or very dusty
- · exposed to direct sunlight
- · poorly ventilated
- subject to extreme temperature or humidity changes, e.g., near an air conditioner or heater.

# Be sure to allow the required space around the machine for servicing and proper ventilation.

## Cautions on handling the machine

Be careful in handling the machine as follows to maintain the performance of this machine.

#### Do not drop the machine, subject it to shock or strike it against any object.

#### Do not expose the drum cartridge to direct sunlight.

• Doing so will damage the surface (green portion) of the drum cartridge, causing smudges on copies.

# Store spare supplies such as drum cartridges and TD (Toner/Developer) cartridges in a cool dry place without removing from the package before use.

• If they are exposed to direct sunlight, or excessive heat, poor copies may result.

#### Do not touch the surface (green portion) of the drum cartridge.

· Scratches or smudges on the drum will cause dirty copies.

#### Supply and Consumables

The supply of spare parts for a repair of the appliance is guaranteed for at least 7 years following the termination of production. Spare parts are those parts of the apparatus which may break down within the scope of ordinary use of the product, whereas those parts which normally exceed the life of the product are not considered spare parts. Consumables also, are available for 7 years following the termination of production.

## Trademark acknowledgements

- Microsoft<sup>®</sup>, Windows<sup>®</sup>, Windows<sup>®</sup> 98, Windows<sup>®</sup> Me, Windows<sup>®</sup> 2000, Windows<sup>®</sup> XP, Windows Vista<sup>®</sup> and Internet Explorer<sup>®</sup> are registered trademarks or trademarks of Microsoft Corporation in the U.S.A. and other countries.
- Macintosh is a trademark of Apple Inc., registered in the U.S. and other countries.
- IBM, PC/AT, and PowerPC are trademarks of International Business Machines Corporation.
- Adobe, the Adobe logo, Acrobat, the Adobe PDF logo, and Reader are registered trademarks or trademarks of Adobe Systems Incorporated in the United States and other countries.
- Sharpdesk is a trademark of Sharp Corporation.
- All other trademarks and copyrights are the property of their respective owners.

# SOFTWARE LICENSE

The SOFTWARE LICENSE will appear when you install the software from the CD-ROM. By using all or any portion of the software on the CD-ROM or in the machine, you are agreeing to be bound by the terms of the SOFTWARE LICENSE.

# **ENVIRONMENTAL INFORMATION**

#### For users in the USA

Products that have earned the ENERGY STAR<sup>®</sup> are designed to protect the environment through superior energy efficiency.

#### Laser information

| Wave length                 | 780 nm +15 nm<br>-10 nm |  |
|-----------------------------|-------------------------|--|
| Pulse times (North America) | 12.88 µs ±12.88 ns/7 mm |  |
| Output power                | Max 0.2 mW              |  |

At the production line, the output power of the scanner unit is adjusted to 0.18 MILLIWATT PLUS 5% and is maintained constant by the operation of the Automatic Power Control (APC).

#### Caution

Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

This Digital Equipment is CLASS 1 LASER PRODUCT (IEC 60825-1 Edition 1.2-2001)

#### SAFETY PRECAUTIONS

This Digital Copier is rated Class 1 and complies with 21 CFR 1040.10 and 1040.11 of the CDRH standards. This means that the equipment does not produce hazardous laser radiation. For your safety, observe the precautions below.

- Do not remove the cabinet, operation panel or any other covers.
- The equipment's exterior covers contain several safety interlock switches. Do not bypass any safety interlock by inserting wedges or other items into switch slots.

A small amount of ozone is produced within the unit during operation. The emission level is insufficient to cause any health hazard. **Note:** 

The present recommended long term exposure limit for ozone is 0.1ppm  $(0.2mg/m^3)$  calculated as an 8 hr. time-weighted average concentration.

However, since the small amount that is emitted may have an objectionable odor, it is advisable to place the unit in a ventilated area.

# INTRODUCTION

Some model may not be available in some countries.

# Using the manual

This machine has been designed to provide convenient copying features in a minimum amount of office space and with maximum operational ease. To get full use of all machine features, be sure to familiarize yourself with this manual and the machine. For quick reference during machine use, keep this manual in a handy location.

#### About the operation manuals

The operation manuals for the machine are as follows:

#### **Operation Manual (this manual)**

Explains the machine and how to use it as a copier. Also explains how to install the software that allows the machine to be used as a printer and scanner for your computer.

#### Online Manual (on the accessory CD-ROM)

This manual explains the procedures for using the machine as a printer or a scanner.

#### Conventions used in this manual and online manual

- Where "AL-XXXX" appears in this manual, please substitute the name of your model for "XXXX". For the name of your model, see the operation panel on the machine.
- Illustrations of driver screens and other computer screens show the screens that appear in Windows XP Home Edition. Some of the names that appear in these illustrations may differ slightly from the screens that appear in other operating systems.
- The explanations in this manual assume that the person who will install the product and the users of the product have a working knowledge of Microsoft Windows.
- This operation manual refers to the Reversing Single Pass Feeder as the "RSPF".
- In this manual, the following icons are used to provide the user with information pertinent to the use of the machine.

# Warns that injury may result if the contents of the warning are not properly followed.

Cautions that damage to the machine or one of its components may result if the contents of the caution are not properly followed.

Notes provide useful information on the specifications, functions, performance, and operation of the machine.

The display screens, messages, and key names shown in the manual may differ from those on the actual machine due to product improvements and modifications.

# MAIN FEATURES

## High-speed laser copying

First-copy time<sup>\*1</sup> is only 8.0<sup>\*2</sup> seconds.

Copying speed is 20 copies per minute. This is ideal for business use and provides a big boost to workplace productivity.

- \*1 The first-copy time is measured after the power save indicator turns off following power on, using the document glass with the polygon rotating in the copy ready state and "LSU SETTING" set to ON in the user programs (8-1/2" x 11", paper fed from paper tray).
- \*<sup>2</sup> When user program 24 is set to OFF.

# High-quality digital image

- High-quality copying at 600 dpi is performed.
- In addition to automatic exposure adjustment, two original modes can be selected: "TEXT" for text-only originals, and "PHOTO" for photographs. The exposure can be adjusted to five levels in each mode.
- The photo mode copying function allows clear copying of delicate halftone original images such as monochrome photos and color photos.

# Enhanced copying features

- Zoom copies can be made from 25% to 400% in increments of 1%. (When the RSPF is being used, the zoom copy ratio range is 50% to 200%.)
- Continuous copying of up to 99 copies is possible.
- Sets of output can be offset from each other for easy separation (offset function).
- Sorting by sets is possible without the need for a sorter or other special device (Sort copy).
- Includes convenient features such as margin shift, 2 IN 1 copy, and automatic twosided copying.

Sort copy

2 IN 1 copy

Margin shift

# Scan once/Print many

• The machine is equipped with a memory buffer allowing the machine to scan an original once and make up to 99 copies of the scanned image. This improves workflow, reduces operating noise from the machine and reduces wear and tear on the scanning mechanism, which provides for a higher reliability.

## LCD panel displays messages

• The LCD panel displays messages that show function settings and the status of the machine.

## Laser printer function

#### • Printer function

The accompanying printer driver can be installed to enable use of the machine as a printer.

#### Network printer function

A LAN connector is provided as a standard feature that allows the machine to be used as a network printer.

## **Color scanner function**

• The accompanying scanner driver can be installed and the machine connected to a computer using a USB cable to enable use as a scanner.

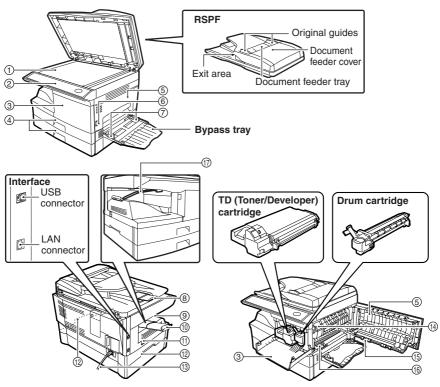

## Environment and people friendly design

- Preheat mode and auto power shut-off mode are provided to reduce power consumption when the machine is not in use.
- A universal design has been implemented in the product whereby the height of the operation panel and shape of the keys are designed to be usable by as many people as possible.

# Chapter 1 PREPARATIONS

This chapter provides basic information that you should know before using the machine.

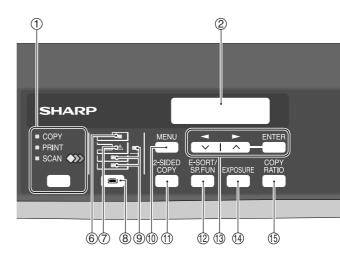

# PART NAMES

- (1) Document glass
- (2) Operation panel
- ③ Front cover
- (4) Paper trays
- (5) Side cover
- (6) Side cover open button
- ⑦ Bypass tray paper guides
- (8) Original output tray extension
- (9) Paper output tray

- (10) Paper output tray extension
- (1) Power switch
- (12) Handles
- (13) Power cord
- (14) Fusing unit release lever
- (15) Transfer charger
- (16) Charger cleaner
- Paper holder arm

## **Operation panel**

#### ① [MODE SELECT] key / Mode indicators

Press this key to select the mode. The indicator of the selected mode lights (copy, printer, scanner indicators).

#### 2 Display

This shows messages indicating the machine status and any problems that occur, as well as user programs and function setting menus.

#### ③Numeric keys

Use these to enter the number of copies and other numerical settings. The keys can also be used to select items in function setting menus.

#### ④[CLEAR] key (⊂)

Use this to clear the set number of copies, as well as cancel a job that is in progress. When a setting menu appears, use this key to move back to the previous menu level.

#### 5 Power save indicator

This lights up when the power save function is activated.

#### 6 RSPF indicator

This lights up when an original is placed in the RSPF.

#### ⑦Error indicator

This lights steadily or blinks when a paper misfeed or other error occurs.

#### ⑧[TRAY SELECT] key ( )

Use to select the paper tray that has the desired paper for copying.

#### ③ Tray location indicator

Indicates the selected paper tray. The indicator blinks when the tray is out of paper during operation or is not closed properly.

#### 10 [MENU] key

Press this key to select the paper size for copying, to configure a user program or to display the total count.

(1) [2-SIDED COPY] key Press to select the automatic two-sided copying mode.

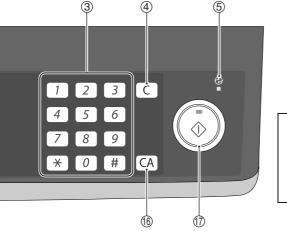

#### 12 [E-SORT/SP.FUN] key

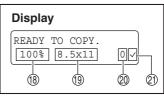

Press to select the sort function, 2 IN 1 copy function, or margin shift function.

[③] ▲] key (○), [▶] key (○),
[ENTER] key
Press the [▲] key (○) or [▶] key
(○) to select an item in a function setting menu.
Press the [ENTER] key to enter a selection.

#### (4) [EXPOSURE] key

Use to switch from auto exposure adjustment to text mode or photo mode.

#### (5 [COPY RATIO] key

Press to select an enlargement or reduction ratio.

To select a preset ratio setting, press the [COPY RATIO] key and select the desired preset ratio. To select a ratio that is not preset, press the [COPY RATIO] key, select the preset ratio that is closest to the desired ratio, and then press the [◀] key (□) or [▶] key (□) to increase or decrease the ratio in increments of 1%.

#### (16 [CLEAR ALL] key (CA)

This returns all functions to the default settings. When pressed in a setting menu, this returns the settings and display to the initial state.

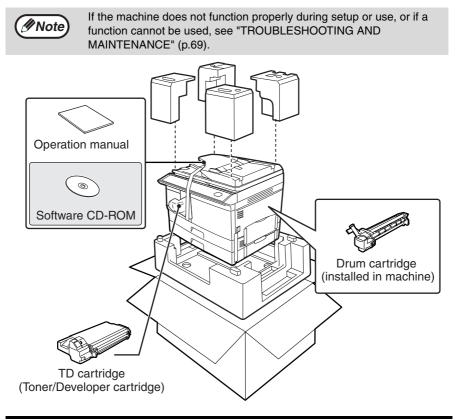

(7) [START] key ( ) / Ready indicator The ready indicator lights up when copying or scanning is possible. To begin copying, press the [START] key ( ).

The [START] key ( ) is also pressed to return to normal operation from auto power shut-off mode.

- (18) Shows the current copy ratio.
- (19) Shows the selected paper size.
- ② Shows the number of copies that has been entered with the numeric keys.
- A checkmark " \sqrt{" appears when the exposure has been changed, or when two-sided copying, sort, 2 IN 1, or margin shift is selected.

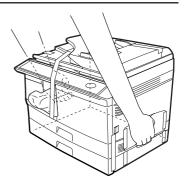

# CHECKING PACKED COMPONENTS AND ACCESSORIES

Open the carton and check if the following components and accessories are included. If anything is missing or damaged, contact our Technical Assistance Department at 1-(630)378-3590 in the USA.

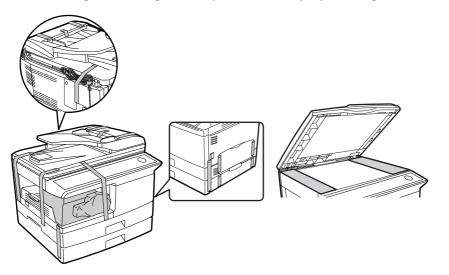

# PREPARING THE MACHINE FOR INSTALLATION

**1** Be sure to hold the handles on both sides of the machine to unpack the machine and carry it to the installation location.

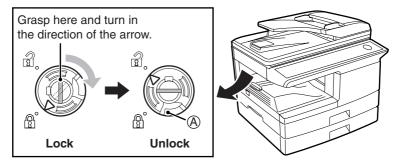

2 Remove all pieces of tape shown in the illustration below and then open the RSPF and remove protective materials. Take out the bag containing the TD (Toner/Developer) cartridge.

#### Release the scan head locking switch.

3

The scan head locking switch is under the document glass. If the switch is locked (0), the machine will not operate. Unlock the switch ( $\fbox{0}$ ) as shown below.

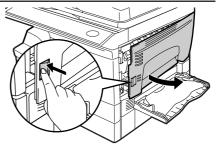

To lock the scan head locking switch, hold up the catch in illustration (A) and turn the center knob counter-clockwise 90 degrees until you hear a click.

# **INSTALLING THE TD (TONER/DEVELOPER) CARTRIDGE**

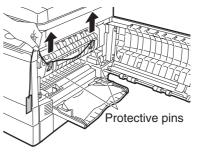

Open the bypass tray, and then open the side cover.

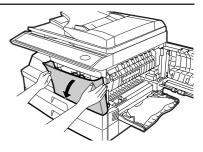

Remove the CAUTION tape from the front cover and remove the two protective pins from the fusing machine by pulling the strings upward one at a time.

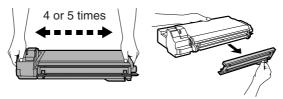

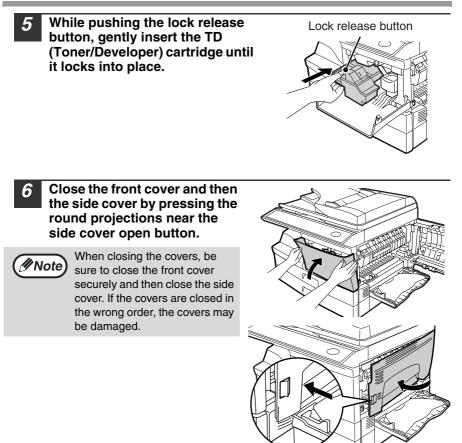

**3** Press gently on both sides of the front cover to open the cover.

**4** Remove the TD (Toner/Developer) cartridge from the bag. Remove the protective paper. Hold the cartridge on both sides and shake it horizontally four or five times. Hold the tab of the protective cover and pull the tab to your side to remove the cover.

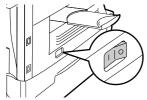

# POWER ON AND OFF

The power switch is located on the left side of the machine.

*Warning* If you use the machine in a country other than the country where the machine was purchased, you will need to make sure that your local power supply is compatible with your model. If you plug the machine into an incompatible power supply, irreparable damage to the machine will result.

## Power on

#### Turn the power switch to the "ON" position.

The ready indicator will light up and other indicators which show the initial settings of the display will also light up to indicate the ready condition. For the initial settings, see "Initial settings" (below).

You can select copy settings and press the [START] key ( ()) after the power switch is turned on. Copying will start automatically.

() Caution

Only insert the power cord into a properly grounded wall socket. Do not use extension cords or power strips.

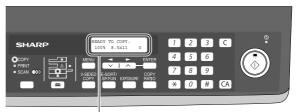

#### Language setting

The first time the power is turned on after shipment from the factory, a message will appear in English in the display prompting you to select the language. Select the language with the  $[\neg ]$  key  $( \Box )$  or  $[ \blacktriangleright ]$  key  $( \Box )$  and then press the [ENTER] key. The language can also be changed in the user programs (p.65).

#### **Initial settings**

The machine reverts to the initial settings when it is first turned on, when the [CLEAR ALL] key ( $\Box$ ) is pressed, or when no keys are pressed for the preset "AUTO CLEAR" time following the end of a copy job. When the machine reverts to the initial settings, all settings and functions selected to that point are canceled. The "AUTO CLEAR" can be changed in the user programs. (p.62)

When in the copy mode

The main screen of copy mode appears.

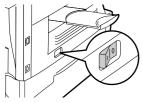

#### Copy ratio: 100%, Exposure: Automatic Copy quantity: 0, All special copier modes: Off

#### Scanning unit (scan head)

When the machine is able to copy or scan (the ready indicator is on), the scanning unit is lit.

### Power off

Make sure that the machine is not in operation and then turn the power switch to the "OFF" position.

If the power switch is turned off while the machine is in operation, a misfeed may occur and the job that was in progress will be canceled.

In cases where the machine will not be used for a long time, turn off the power switch and remove the power cord from the outlet.

Check the following to make sure the machine is not in operation:

- The ready indicator is lit. (Initial state)
- The power save indicator is lit. (preheat mode or auto power shut-off mode)

### Power save modes

The machine has two power save modes to reduce overall power consumption and thereby reduce the cost of operation. In addition, these modes conserve natural resources and help reduce environmental pollution. The two power save modes are preheat mode and auto power shut-off mode.

#### Preheat mode

This function automatically switches the machine to a low power consumption state if the set duration of time elapses without the machine being used when the power is on. In this mode, the power save indicator lights up. Normal operation automatically resumes when a key on the operation panel is pressed, an original is placed, a print job is received.

#### Auto power shut-off mode

This function automatically switches the machine to a state that consumes even less power than preheat mode if the set duration of time elapses without the machine being used when the power is on. The power save indicator lights up, the display shows a message indicating that the machine is in auto power shut-off mode. To resume normal operation, press the [START] key ( $\bigcirc$ ). Normal operation also resumes automatically when a print job is received or scanning is begun from a computer. While in auto power shut-off mode, no keys (except the [START] key ( $\bigcirc$ )) can be used.

The preheat activation time and the auto power shut-off time can be changed with "PREHEAT MODE" and "AUTO SHUT-OFF TIME" in the user programs. It is suggested that you set times that are appropriate for your usage of the machine. (p.62 and p.63)

The tray location indicator will blink when there is no paper in the selected paper tray, or when the selected paper tray is not closed or is improperly closed.

# PAPER

For best results, use only SHARP recommended paper.

| Paper tray type | Paper type                       | Size  | Weight   | Capacity  |
|-----------------|----------------------------------|---|--|---|
| Paper tray      | Standard paper<br>Recycled paper |   | 15 lbs. to 21 lbs.<br>(56 g/m <sup>2</sup> to<br>80 g/m <sup>2</sup> ) | 250 sheets *1<br>(The paper<br>should not<br>exceed the<br>line on the<br>tray) |
| Bypass tray     | Standard paper<br>Recycled paper | 3-1/2" x 5-1/2" to<br>8-1/2" x 14"  | 15 lbs. to 21 lbs.<br>(56 g/m <sup>2</sup> to<br>80 g/m <sup>2</sup> ) | 50 sheets *1  |

|                 | Envelopes * <sup>2</sup>         | Monarch<br>(3-7/8" x 7-1/2")<br>Commercial 9<br>(3-7/8" x 8-7/8")<br>Commercial 10<br>(4-1/8" x 9-1/2") |  | 5)pace itaj.  |

\*1 The number of sheets of paper that can be loaded varies depending on the weight of the paper.

\*<sup>2</sup> Do not use non-standard envelopes or envelopes that have metal clasps, plastic snappers, strings, windows, linings, self-adhesive strips, patches or synthetic materials. Do not use envelopes that are filled with air or envelopes that have labels or stamps attached. These will damage the machine.

 $^{\star3}$  When using paper heavier than 28 lbs. (104  ${\rm g/m^2}),$  use paper that is 8-1/2" x 11" or smaller.

## **Special papers**

Follow these guidelines when using special papers.

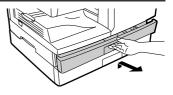

- Use SHARP recommended transparency film and label sheets. Using other than SHARP recommended paper may result in misfeeds or smudges on the output. If other than SHARP recommended media must be used, feed each sheet one at a time using the bypass tray (do not attempt continuous copying or printing).
- There are many varieties of special paper available on the market, and some cannot be used with this machine. Before using special paper, contact a SHARP service center.
- Before using other than SHARP recommended paper, make a test copy to see if the paper is suitable.

# LOADING THE PAPER TRAY

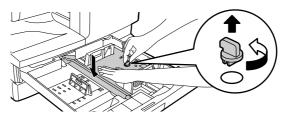

Make sure that the paper is not torn, is free of dust, and has no wrinkles or curled edges.

**1** Raise the handle of the paper tray and pull the paper tray out until it stops.

2 Remove the pressure plate lock. Rotate the pressure plate lock in the direction of the arrow to remove it while pressing down the pressure plate of the paper tray.

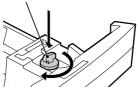

∕∕∕Note

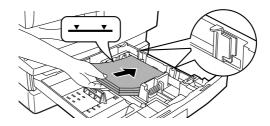

Store the pressure plate lock which has been removed in step 2. To store the pressure plate lock, rotate the lock to secure it as shown below.

Pressure plate lock

# Fan the paper and insert it into the tray. Make sure that the edges go under the corner hooks.

- Do not load paper above the maximum height line ( <u>▼</u>.). Exceeding the line will cause a paper misfeed.
- If the paper is not fanned, double-feeds or misfeeds may occur.
- Make sure the stack of paper is straight before loading it. When adding paper, take the remaining paper out and combine it into a single stack with the new paper.
- Make sure that all the paper in the stack is the same size and type.
- When loading paper, ensure that there is no space between the paper and the guide, and make sure that the guide is not set too narrow and causes the paper to bend. Incorrect loading will cause the paper to skew or misfeed.

Gently push the paper tray back into the machine.

( Note

- If you loaded a paper size that is different from the previously loaded paper size, change the paper size setting as explained in "CHANGING A TRAY'S PAPER SIZE SETTING" (p.23)
- When not using the machine for an extended period, remove all paper from the paper tray and store it in a dry place. If paper is left in the machine for an extended period, the paper will absorb moisture from the air, resulting in paper jams.

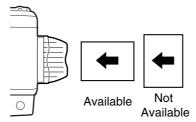

# BYPASS FEED (including special paper)

The bypass tray can be used to feed standard paper, transparency film, labels, envelopes, and other special purpose paper.

### Important points when inserting paper in the bypass tray

Up to 50 sheets of standard copy paper can be inserted in the bypass tray. (Capacity will vary depending on the type of paper loaded.)

Be sure to place envelopes horizontally as shown in the following diagram.

- When loading envelopes, make sure that they are straight and flat and do not have loosely glued construction flaps (not the closure flap).
- Special papers such as SHARP recommended transparency film, labels, and envelopes must be fed one sheet at a time through the bypass tray.
- When adding paper, first remove any paper remaining in the tray, combine it with the paper to be added and then reload as a single stack. The paper to be added must be the same size and type as the paper already in the tray.
- Do not use paper that is smaller than the original. This may cause smudges or unclean images.
- Do not use paper that has already been printed on by a laser printer or plain paper fax machine. This may cause smudges or unclean images.

## Envelopes

Do not use the following envelopes, as misfeeds will occur.

- Envelopes with metal tabs, clasps, strings, holes, or windows.
- Envelopes with rough fibers, carbon paper, or glossy surfaces.
- Envelopes with two or more flaps.
- Envelopes with tape, film, or paper attached to the flap.
- Envelopes with a fold in the flap.
- Envelopes with glue on the flap to be moistened for sealing.
- Envelopes with labels or stamps.
- Envelopes that are slightly inflated with air.
- Envelopes with glue protruding from the seal area.
- · Envelopes with part of the seal area peeled off.
- Be sure to select com9, com10 or Monarch in the paper size setting of the printer driver. (For detailed information on the printer driver, refer to the online manual.)

#### LOADING PAPER

## Loading paper in the bypass tray

# Note

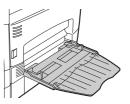

- Paper must be fed narrow side first into the feed slot.
- Special papers such as transparency film, labels, and envelopes must be fed one sheet at a time through the bypass tray.
- When copying onto transparency film, remove each copy promptly. Do not let copies stack up.

#### Open the bypass tray and extend the tray.

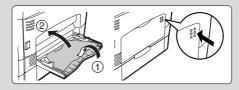

To close the bypass tray, perform step ① and then step ② in the illustration and push the round projections at the right of the tray until they click.

Set the bypass tray paper guides to the paper width. Insert the paper (print face down) all the way into the bypass tray.

3

2

Press the [TRAY SELECT] key (
) to select the bypass tray.

#### Note for loading thick paper

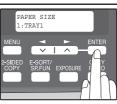

Confirm that user program 29 is set to "2 (HEAVY PAPER)" when using thick paper. (See page 65.)

# **CHANGING A TRAY'S PAPER SIZE SETTING**

Follow these steps to change a tray's paper size setting.

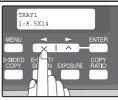

- The paper size setting cannot be changed when the machine has stopped temporarily due to running out of paper or a misfeed.
- During printing (even in copy mode), the paper size setting cannot be changed.
- Press the [MENU] key. Press the [→] key (□) or [▶] key (□) until "PAPER SIZE" appears, and then press the [ENTER] key.
- 2 Press the [◄] key (□) or [►] key (□) to select the tray, and then press the [ENTER] key.

Press the [--] key (□) or [▶] key (□) to select the paper size, and then press the [ENTER] key.

The paper size changes as follows each time the [ $\checkmark$ ] key ( $\boxdot$ ) or [ $\blacktriangleright$ ] key ( $\frown$ ) is pressed: "8.5x14" $\rightarrow$ "8.5x13" $\rightarrow$ "8.5x11" $\rightarrow$ "5.5x8.5"  $\rightarrow$ "A4" $\rightarrow$ "B5" $\rightarrow$ "A5".

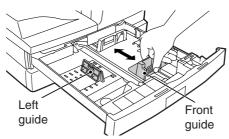

Note

3

When you have finished configuring the tray's paper size setting, press the [MENU] key.

**4** Squeeze the lock lever of the front guide and slide the front guide to match the width of the paper, and move the left guide to the appropriate slot as marked on the tray.

- The front guide is a slide-type guide. Grasp the locking knob on the guide and slide the guide to the indicator line of the paper to be loaded.
- The left guide is an insert-type guide. Remove it and then insert it at the indicator line of the paper to be loaded.

This chapter explains basic copying functions.

# NORMAL COPYING Using the document glass

- The document glass can scan up to 8-1/2" x 14" original.
- When a copy is made, the edges will not be copied (image loss). For the image loss, see the "SPECIFICATIONS" (p.91).

2

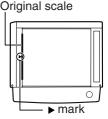

Note

Note

# Open the RSPF, and place the original face down on the document glass.

#### [How to place the original]

Align the original with the original scale and the centering  $(\blacktriangleright)$  mark.

#### Gently close the RSPF.

By factory default, when a copy is made with the RSPF cover open, the function for preventing excessive toner use activates and "CHECK ORIGINAL" appears in the display. (See the "Check RSPF open function" (p.25).)

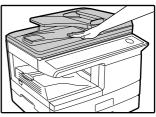

# Select the number of copies and any other copy settings, and then press the [START] key ( ()).

- To stop copying in the middle of a run, press the [CLEAR] key (C).
- For the copy settings, see pages 27 through 39.

#### Copying books or originals with folds or creases

Press down on the RSPF while copying as shown. If the RSPF is not completely closed, shadows may appear on the copy or it may be fuzzy. Straighten originals that have folds or creases before placing it on the document glass.

#### **Check RSPF open function**

When enabled in program number 24 (p.65), this function may help prevent wasteful use of toner that occurs when the RSPF cover is not completely closed.

If the start ( ) key is pressed when the RSPF cover is not completely closed, "CHECK ORIGINAL" will appear in the display and copying may not take place. If copying does not take place, copying can be performed by pressing the start ( ) key again, however, the scan size set in "CHANGING A TRAY'S PAPER SIZE SETTING" (p.23) or "VALID COPY WIDTH" (program number 25) (p.65) will be used.

If the RSPF cover is completely closed after "CHECK ORIGINAL" appears, copying will take place at the normal size.

When this function is off, if the [Start] key ( ) is pressed to make a copy with the RSPF cover open, parts outside of the original will be copied black. Even when this function is on, if the [Start] key ( ) is pressed twice to make a copy with the RSPF cover open, parts outside the original may be copied black. To prevent excessive use of toner, make sure that the RSPF cover is closed when making a copy.

## Using the RSPF

Note

Note

3

Note

| • Originals that are 5-1/2" x 8-1/2" to 8-1/2" x 14" and 15 lbs. to 24 lbs. (56 g/       |  |
|--|--|
| $m^2$ to 90 g/m <sup>2</sup> ) can be used. A maximum of 50 pages can be placed at once. |  |

- Straighten curled originals before placing them in the document feeder tray. Curled originals may cause misfeeds.
- Place originals horizontally.
- Before placing originals in the document feeder tray, be sure to remove any staples or paper clips from them.
- When a copy is made, the edges will not be copied (image loss). For the image loss, see the "SPECIFICATIONS" (p.91).
- When using the margin shift function, check the position of the margins carefully. (p.38)

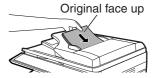

# Make sure that an original has not been left on the document glass.

Adjust the original guides to the size of the originals.

# Place the original(s) face up in the document feeder tray without trying to force them in.

The RSPF indicator on the operation panel will light up. If this indicator does not light up, the originals are not properly set or the RSPF is not properly closed.

# Select the number of copies and any other copy settings, and then press the [START] key ( ).

- The default output mode for copying from the RSPF is sort mode (P.33), and a checkmark " 
   " will automatically appear in the display (P.11). If "SORT AUTO SELECT" is disabled in the user programs, the default output mode will be non-sort mode. (P.65)
  - To stop copying in the middle of a run, press the [CLEAR] key (C).
  - For the copy settings, see pages 27 through 39.

### MAKING COPIES

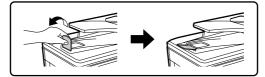

#### Originals that cannot be used in the RSPF

The following originals cannot be used. These may cause misfeeds or smudging and unclear images.

- Transparencies, tracing paper, other transparent or translucent paper, and photographs.
- Carbon paper, thermal paper.
- Originals that are creased, folded, or torn.
- Glued originals, cut-out originals.
- Originals with binder holes.
- Originals printed using an ink ribbon (thermal transfer printing), originals on thermal transfer paper.

#### Original output tray extension

When placing an original larger than 8-1/2" x 11" size, pull out the original output tray extension of the RSPF.

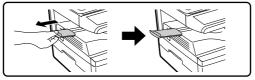

#### Capacity of paper output tray

The paper output tray can hold a maximum of 200 pages. If more than 200 pages are allowed to accumulate, a paper jam may occur.

#### Paper output tray extension

When copying onto paper larger than  $8-1/2" \times 11"$  size, pull out the paper output tray extension.

#### Paper holder arm

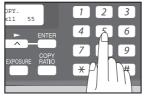

The paper output tray has a paper holder arm. The paper holder arm presses gently on the output paper to stack it (p.9).

After removing paper, if you need to return the paper to the paper output tray, lift up the paper holder arm and place the paper under the arm.

## Setting the number of copies

Press the numeric keys to set the number of copies.

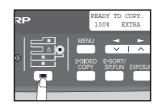

- The set number of copies appears in the display. A maximum of 99 copies can be set.
- If you wish to make only a single copy, copying is possible with the display showing "0".

If you enter the wrong number, press the [CLEAR] key (C) and enter the correct number.

## SELECTING THE TRAY Press the [TRAY SELECT] key ().

Each time, you press the [TRAY SELECT] key (□), the location indicated by the tray location indicator changes in the following order : paper tray→lower paper tray→bypass tray.

The tray location indicator will blink when there is no paper in the paper tray during operations, or when the tray is not closed or is improperly closed.

# MAKING A COPY DARKER OR LIGHTER

Automatic exposure adjustment is initially enabled. This function automatically adjusts the copy image according to the original being copied. If you wish to select the exposure level yourself, follow the steps below. (Select from 2 original types and 5 exposure levels for each original type.) The exposure level used in automatic exposure adjustment can also be changed with "AE LEVEL ADJUST" in the user programs (p.65).

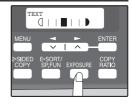

### **Original types**

- AUTO ..... Automatic exposure adjustment is enabled and the exposure is automatically adjusted according to the original being copied. The exposure is lowered for colored areas and background shadows.
- TEXT...... The exposure is raised for light areas and lowered for dark backgrounds to make text easier to read.
- PHOTO ... Halftones in the photo are reproduced with greater clarity.

# Press the [EXPOSURE] key to select the original type.

The original image type changes as follows each time the [EXPOSURE] key is pressed: "AUTO"  $\rightarrow$  "TEXT"  $\rightarrow$  "PHOTO".

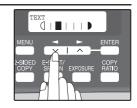

To return to auto exposure adjustment, press the [EXPOSURE] key until "AUTO" appears.

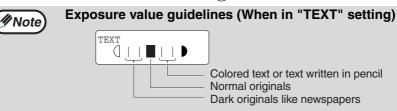

# If needed, adjust the exposure level for TEXT or PHOTO.

For a darker image, press the  $[\frown]$  key  $(\frown)$ . For a lighter image, press the  $[\frown]$  key  $(\frown)$ .

## Press the [ENTER] key.

Select the number of copies and any other copy settings, and then press the [START] key ( ()).

# **REDUCTION/ENLARGEMENT/ZOOM**

Copies can be reduced down to 25% or enlarged up to 400%. (When the RSPF is being used, the zoom copy ratio range is 50% to 200%.) The [COPY RATIO] key can be pressed to quickly select a ratio from among eight preset ratios. In addition, the [-] key (-) and [-] key (-) can be pressed to select the ratio in increments of 1%.

#### Place the original(s) and check the paper size.

3

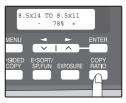

Press the [COPY RATIO] key.

# Press the [COPY RATIO] key and/or [→] key (□) or [▶] key (□) to select the desired copy ratio and then press the [ENTER] key.

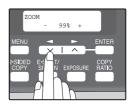

#### Selecting a preset ratio

The preset ratios change as follows each time the [COPY RATIO] key is pressed: "100%"  $\rightarrow$  "78%"  $\rightarrow$  "64%"  $\rightarrow$  "50%"  $\rightarrow$  "25%"  $\rightarrow$  "400%"  $\rightarrow$  "200%"  $\rightarrow$  "129%"

#### Fine adjustment of the ratio

The ratio can be adjusted from 25% to 400% in increments of 1%. Use the  $[\frown]$  key  $(\frown)$  or the  $[\frown]$  key  $(\frown)$  for fine adjustment.

- To return the ratio to 100%, press the [COPY RATIO] key until 100% appears.
- Press the [COPY RATIO] key to set the approximate ratio, then press the [→] key (□) or [▶] key (□).
- To decrease or increase the zoom ratio rapidly, hold down the [→] key (○) or [▶] key (○).
   The ratio will stop changing at each of the preset ratios. To continue changing the ratio, release the key and then hold it down again.

# 4

# Select the number of copies and any other copy settings, and then press the [START] key ( $\bigcirc$ ).

The copy will be delivered to the paper output tray.

# **AUTOMATIC TWO-SIDED COPYING**

Two originals can be automatically copied onto both sides of a single sheet of paper. When the RSPF is used, two-sided copies of two-sided originals can easily be made.

|                   | $\mathbf{Original} \to \mathbf{Paper}$ |                                     |   | Usable paper   |
|-------------------|--|-------------------------------------|---|--|
| Document<br>glass | One-sided original → Two sides         |                                     |   | 5-1/2" x 8-1/2", 8-1/2" x<br>11", 8-1/2" x 13",<br>8-1/2" x 14"<br>• The bypass tray<br>cannot be used.  |
| RSPF              | One-sided<br>original →<br>Two sides   | Two-sided<br>original →<br>One side | Two-sided<br>original →<br>Two sides<br>→ | <ul> <li>5-1/2" x 8-1/2", 8-1/2" x<br/>11", 8-1/2" x 13",<br/>8-1/2" x 14"</li> <li>Special paper cannot<br/>be used.</li> <li>The bypass tray can<br/>only be used when<br/>making one-sided<br/>copies from two-<br/>sided originals.</li> </ul> |

When performing automatic two-sided copying of one-sided originals, the orientation of the copied image can be selected according to the binding position of the paper.

**SHORT EDGE**: Select when binding the paper at the short edge.

| Α |   |
|---|---|
| В | ſ |

(Paper orientation: Landscape) (Paper orientation: Portrait)

LONG EDGE: Select when binding the paper at the long edge.

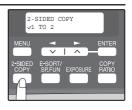

| Α | В |
|---|---|
|   |   |

(Paper orientation: Landscape) (Paper orientation: Portrait)

## Using the document glass

Place the original that you wish to copy onto the front side of the paper on the document glass and close the RSPF.

Press the [2-SIDED COPY] key until "1 TO 2" appears, and then press the [ENTER] key.

**3** Press the [◄] key (□) or [►] key (□) to select the binding edge and then press the [ENTER] key.

Select "LONG EDGE" or "SHORT EDGE". The "LONG EDGE" and "SHORT EDGE" are shown in the illustration on the preceding page.

**4** Select the number of copies and any other settings, and then press the [START] key ( (()).

"[START] : NEXT SCAN [#] : START PRINT" appears and the original is scanned into memory.

To immediately print the scanned image, press the [#] key.

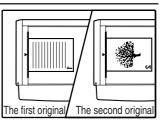

**5** Replace the original with the next original and close the RSPF, and then press the [START] key ( ()).

//Note

Repeat step 5 until all originals have been scanned.

Copies will be output each time two originals have been scanned.

When the number of original pages is odd and "[START] : NEXT SCAN [#] : START

PRINT" appears, press the [#] key after all pages have been scanned.

- If you need to clear the data scanned into memory, press the [CLEAR] key (C). When the [CLEAR] key (C) is pressed, the number of copies setting is also cleared.
  - To cancel automatic two-sided copying, press the [CLEAR ALL] key ((CA)) or press the [2-SIDED COPY] key, select the "1 TO 1", and then press the [ENTER] key.
  - If the special function sort mode was selected in step 4, copying will not begin until the [#] key is pressed.

#### CONVENIENT COPY FUNCTIONS

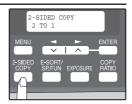

### Using the RSPF

#### Place the original(s) in the RSPF. (p.25)

If you place an odd number of originals for one-sided to two-sided copying, the last page will be one-sided.

#### Press the [2-SIDED COPY] key and select 2 the two-sided copy mode that you wish to use.

The mode changes as follows each time you press the [2-SIDED COPY] key: "1 TO 1"  $\rightarrow$  "1 TO 2"  $\rightarrow$  "2 TO 2"  $\rightarrow$  "2 TO 1"

- "1 TO 2": Two-sided copies from one-sided originals
- "2 TO 2": Two-sided copies from two-sided originals
- "2 TO 1": One-sided copies from two-sided originals

#### Press the [ENTER] key. 3

If you selected "1 TO 2" in step 2, select "LONG EDGE" or "SHORT EDGE" and press the [ENTER] key. LONG EDGE and SHORT EDGE are shown in the illustration on page 30.

#### If you selected "2 TO 1" or "2 TO 2", press 4 the $[\blacktriangleleft]$ key $(\frown)$ or $[\blacktriangleright]$ key $(\frown)$ to select the original size and then press the [ENTER] key.

The following original sizes can be selected: "8.5x14", "8.5x13", "8.5x11", "5.5x8.5", "A4", "B5", "A5"

#### 5 Select the number of copies and any other settings, and then press the [START] key ( ).

The copy will be delivered to the paper output tray.

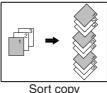

To cancel automatic two-sided copying, press the [CLEAR ALL] key (CA) or press the [2-SIDED COPY] key, select the "1 TO 1", and then press the [ENTER] key.

# SORT COPY

Copies of multiple original pages can be sorted into sets.

The number of pages that can be scanned varies depending on the original type (photo, text, etc.) and the amount of memory allocated to the printer. The amount of memory allocated to the printer can be changed with "MEM. FOR PRINTER" in the user programs. (p.64)

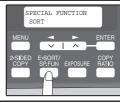

## Using the document glass

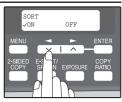

Place the first original. (p.24)

Press the [E-SORT/SP.FUN] key until "SORT" appears and then press the [ENTER] key.

Press the [ $\blacktriangleleft$ ] key ( $\square$ ) to move " $\checkmark$ " to the "ON" position and then press the [ENTER] key.

Select the number of copies and any other settings, and then press the [START] key ( 🔊 ).

"[START] : NEXT SCAN [#] : START PRINT" appears and the original is scanned into memory.

Replace the original with the next original, and then press the [START] key (((())).

Repeat step 5 until all originals have been scanned into memory.

To clear the data in memory, press the [CLEAR] key (C). When the [CLEAR] key (C) is pressed, the number of copies setting is also cleared.

When all originals have been scanned, press the [#] key. The copies are delivered to the paper output tray.

- To cancel the sort copy job, press the [CLEAR] key (C).
- To cancel sort copy mode, press the [CLEAR ALL] key ([CA]).

## Using the RSPF

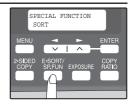

∕ØNote

#### Place the originals. (p.25)

- - If "SORT AUTO SELECT" is disabled, the default output mode will be nonsort mode. Follow the steps below to select sort mode.

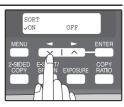

Press the [E-SORT/SP.FUN] key until "SORT" appears and then press the [ENTER] key.

Press the [◀] key (◻) to move "√" to the "ON" position and then the [ENTER] key.

Select the number of copies and any other settings, and then press the [START] key (  $\bigcirc$  ).

The copies are delivered to the paper output tray.

- To cancel the sort copy job, press the [CLEAR] key (C).
- To cancel sort copy mode, press the [CLEAR ALL] key (CA).

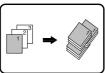

#### If the memory becomes full

- If the memory becomes full while scanning the originals, "MEMORY FULL, PRESS START TO RESUME" will appear in the display, and the machine will stop copying.
- To copy the originals that have been scanned up to that point, press the [START] key (()).
- To clear the data that has been scanned into memory, press the [CLEAR ALL] key (CA) or the [CLEAR] key (C).

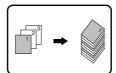

#### Offset function during sort copy

The offset function shifts the position of each set of copies in the paper output tray for easy separation.

The offset function can be changed with "OFFSET FUNCTION" in the user programs. (p.63)

Offset function

When offset function is disabled

### COPYING MULTIPLE ORIGINALS ONTO A SINGLE SHEET OF PAPER (2 IN 1 copy)

Multiple originals can be copied onto a single sheet of paper in a selected layout pattern.

This function is convenient for compiling multi-page reference materials into a compact format, or for providing an overview of all pages of a document on a single page.

Pattern 1

Pattern 2

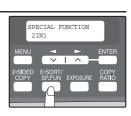

- (
  Note
- An appropriate ratio setting will be automatically selected based on the size of the originals, the size of the paper. When using the document glass, reduction is possible to 25%. When using the RSPF, reduction is possible to 50%. Certain combinations of original size and paper size may result in images being cut off.
  - 2 IN 1 copying cannot be used in combination with the margin shift copying.
  - The 2 IN 1 layout pattern can be changed with "LAYOUT IN 2IN1" in the user programs (p.63).
  - The bypass tray cannot be used for 2 IN 1 copying.

### Using the document glass

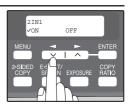

Place the first original. (p.24)

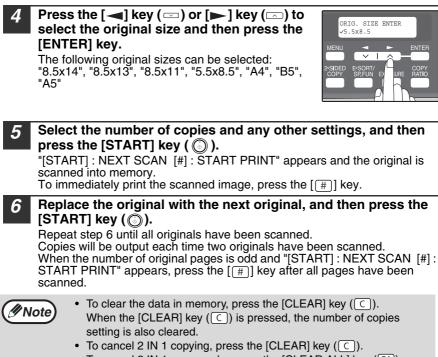

Press the [E-SORT/SP.FUN] key until "2IN1" appears and then press the [ENTER] key.

**3** Press the [◄] key (□) to move "√" to the "ON" position and then press the [ENTER] key.

### **CONVENIENT COPY FUNCTIONS**

• To cancel 2 IN 1 copy mode, press the [CLEAR ALL] key (CA).

SPECIAL FUNCTION

2IN1

2IN1

√ON

### Using the RSPF

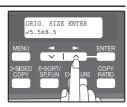

Place the originals. (p.25)

- Press the [E-SORT/SP.FUN] key until "2IN1" appears and then press the [ENTER] key.
- **3** Press the [◄] key (□) to move "√" to the "ON" position and then press the [ENTER] key.

[ENTER] key. The following original sizes can be selected: "8.5x14", "8.5x13", "8.5x11", "5.5x8.5", "A4", "B5", "A5"

Press the  $[\frown]$  key  $(\frown)$  or  $[\frown]$  key  $(\frown)$  to

select the original size and then press the

OFF

# Select the number of copies and any other settings, and press the [START] key ( ().

The copy is delivered to the paper output tray.

4

5

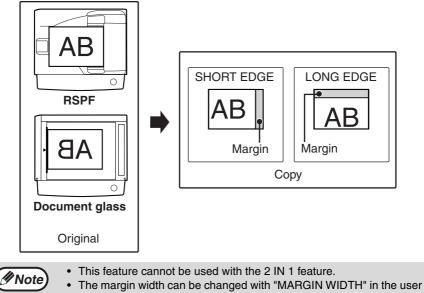

- To cancel 2 IN 1 copying, press the [CLEAR] key (C).
- To cancel 2 IN 1 copy mode, press the [CLEAR ALL] key (CA).

### **CREATING MARGINS WHEN COPYING**

### (Margin shift)

The margin shift function is used to automatically shift the text or image or the copy paper approximately 1/2".

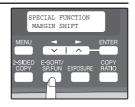

As shown below, LONG EDGE or SHORT EDGE can be selected.

- The margin width can be changed with MARGIN WIDTH in the disc programs. (p.64)
   Note that a margin is created by shifting the image, and thus if the
- Note that a margin is created by shifting the image, and thus if the image is shifted too far, the edge of the image may be cut off.

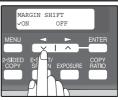

Place the original(s).

Press the [E-SORT/SP.FUN] key until "MARGIN SHIFT" appears and then press the [ENTER] key.

### **CONVENIENT COPY FUNCTIONS**

**3** Press the [◄] key (□) to move "√" to the "ON" position and then press the [ENTER] key.

4 Press the [◄] key (□) or [►] key (□) to select the margin position and then press the [ENTER] key.

Select "LONG EDGE" or "SHORT EDGE". For the margin position, see the previous page.

# Select the number of copies and any other settings, and then press the [START] key ( $\bigodot$ ).

The copy is delivered to the paper output tray.

- Mote :
- To cancel margin shift copying, press the [CLEAR] key (C).
  - To cancel margin shift mode, press the [CLEAR ALL] key ( $\fbox{CA}$ ).

Chapter 5 INSTALLING THE SOFTWARE

This chapter explains how to install and configure the software that is required for the printer and scanner functions of the machine. The procedure for viewing the Online Manual is also explained.

- The explanations of screens and procedures in this manual are primarily for Windows XP.
- This manual refers to the CD-ROM that accompanied the machine simply as "CD-ROM".

### SOFTWARE

The CD-ROM that accompanies the machine contains the following software:

### MFP driver

#### Printer driver

The printer driver enables you to use the printer function of the machine. The printer driver includes the Print Status Window. This is a utility that monitors the machine and informs you of the printing status, the name of the document currently being printed, and error messages.

Please note that the Print Status Window does not operate when the machine is used as a network printer.

#### Scanner driver\*

The scanner driver allows you to use the scanning function of the machine with TWAIN-compliant and WIA-compliant applications.

### Sharpdesk\*

Sharpdesk is an integrated software environment that makes it easy to manage documents and image files, and launch applications.

### **Button Manager\***

Button Manager allows you to use the scanner menus on the machine to scan a document.

\* The scanning feature can only be used with computers that are connected to the machine by a USB cable. If you are connected to the machine by a LAN connection, only the printer function can be used.

### **BEFORE INSTALLATION**

### Hardware and software requirements

Check the following hardware and software requirements in order to install the software.

| Computer type   | IBM PC/AT or compatible computer equipped with a USB2.0* <sup>1</sup> /1.1* <sup>2</sup> or 10Base-T LAN interface          |
|---|---|
| Operating system*3 *4   | Windows 98, Windows Me, Windows 2000 Professional* <sup>5</sup> ,<br>Windows XP* <sup>5</sup> , Windows Vista* <sup>5</sup> |
| Display   | 1024 x 768 dots resolution and 16-bit color or higher is recommended.   |
| Hard disk free space  | 150 MB or more  |
| Other hardware<br>requirementsAn environment on which any of the operating sy<br>listed above can fully operate |   |

\*<sup>1</sup> The machine's USB connector will transfer data at the speed specified by the USB 2.0 (Hi-Speed) only if the Microsoft USB 2.0 driver is installed in the computer.

\*<sup>2</sup> Compatible with Windows 98, Windows Me, Windows 2000 Professional, Windows XP or Windows Vista preinstalled model standardly equipped with a USB port.

\*<sup>3</sup> Printing is not available in MS-DOS mode.

\*<sup>4</sup> The machine does not support printing from a Macintosh environment.

\*<sup>5</sup> Administrator's rights are required to install the software using the installer.

### Installation environment and usable software

The following table shows the drivers and software that can be installed for each version of Windows and interface connection method.

| Cable | Operating system                | Printer<br>driver | Scanner<br>driver | Button<br>Manager | Sharpdesk |
|-------|---------------------------------|-------------------|-------------------|-------------------|-----------|
| USB   | Windows 98/Me/<br>2000/XP/Vista | Available*        |                   | Available         |           |
| LAN   | Windows 98/Me/<br>2000/XP/Vista | Available         |                   | Not Available     |           |

\* The printer driver that is installed will vary depending on the type of connection between the machine and your computer.

### **INSTALLING THE SOFTWARE**

| Note  | <ul> <li>If you need to use a different connection method after installing the software using a USB or network connection, you must first uninstall the software and then install it using the new connection method.</li> <li>The screen images in this manual are mainly for Windows XP. With other versions of Windows, some screen images may be different from those in this manual.</li> <li>In the following explanations it is assumed that the mouse is configured for right hand operation.</li> <li>The scanner function only works when using a USB cable.</li> <li>If an error message appears, follow the instructions on the screen to solve the problem. After the problem is solved, the installation procedure will continue. Depending on the problem, you may have to click the "Cancel" button to exit the installer. In this case, reinstall the software from the beginning after solving the problem.</li> </ul> |  |  |
|---|--|--|--|
| Using the machine with a USB connection   |  |  |  |
| <b>1</b> The USB cable must not be connected to the machine. Make sure that the cable is not connected before proceeding. |  |  |  |

If the cable is connected, a Plug and Play window will appear. If this happens, click the "Cancel" button to close the window and disconnect the cable.

///Note

The cable will be connected in step 13.

Click the "start" button, click "My Computer" (), and then double-click the CD-ROM icon ().

- In Windows Vista, click the "Start" button, click "Computer", and then double-click the CD-ROM icon.
- In Windows 98/Me/2000, double-click "My Computer", and then double-click the CD-ROM icon.

In Windows Vista, if a message screen appears asking you for confirmation, click "Allow".

#### The "SOFTWARE LICENSE" window will appear. Make sure that you understand the contents of the software license, and then click the "Yes" button.

You can show the "SOFTWARE LICENSE" in a different language by selecting the desired language from the language menu. To install the software in the selected language, continue the installation with that language selected.

Connected via the network Printer Driver The Printer Driver will be in Set the IP Address Set the IP Address.

< Back Next> Close

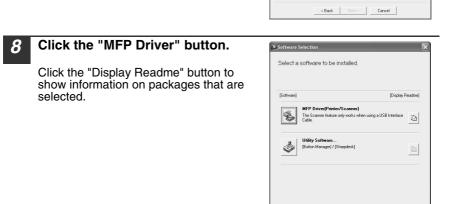

۵J

Read the "Readme First" in the "Welcome" window and then click the "Next" button.

6

9

To install all of the software, click Setup Type Selection the "Standard" button and go to Select a type of setup to be installed. step 12. To install particular packages, Connected to this computer Standard The MFP driver ( The MFP driver (Printer and Scanner), Button Manager, and Sharp will be installed for USB connected MFP Parconnected click the "Custom" button and go 8 to next step. Sale Custom You may choose the option you want to instal. Rec advanced users.

The files required for installation of the MFP driver are copied. Follow the on-screen instructions.

When "The installation of the SHARP software is complete." appears, click the "OK" button.

If you are using Windows Vista and a security warning window (!)Caution appears, be sure to click "Install this driver software anyway".

 If you are running Windows 2000/XP and a warning message appears regarding the Windows logo test or digital signature, be sure to click "Continue Anyway" or "Yes".

#### You will return to the window of step 8. If you wish to install Button Manager or Sharpdesk, click the "Utility Software" button.

If you do not wish to install the Utility Software, click the "Close" button and go to step 12.

After the installation, a message prompting you to restart your computer may appear. In this case, click the "Yes" button to restart your computer.

#### Installing the Utility Software

Click the "Display Readme" button to show information on packages that are selected.

Follow the on-screen instructions.

In Windows 98/Me/2000, if the following screen appears, click the "Skip" button or the "Continue" button as appropriate to continue the Sharpdesk installation.

If "Skip" is selected, the Sharpdesk installation will continue without installing Sharpdesk Imaging. If "Continue" is selected, Sharpdesk Imaging will be installed. If Imaging for Windows is installed on your computer, Sharpdesk Imaging will overwrite Imaging for Windows.

### When installing is finished, click the "Close" button.

### () Caution

 If you are using Windows Vista and a security warning window appears, be sure to click "Install this driver software anyway".

If you are running Windows 2000/XP and a warning message appears regarding the Windows logo test or digital signature, be sure to click "Continue Anyway" or "Yes".

A message will appear instructing you to connect the machine to your computer. Click the "OK" button.

After the installation, a message prompting you to restart your computer may appear. In this case, click the "Yes" button to restart your computer.

# Make sure that the power of the machine is turned on, and then connect the USB cable (p.46).

Windows will detect the machine and a Plug and Play screen will appear.

# Follow the instructions in the plug and play window to install the driver.

Follow the on-screen instructions.

### !Caution

- If you are using Windows Vista and a security warning window appears, be sure to click "Install this driver software anyway".
- If you are running Windows 2000/XP and a warning message appears regarding the Windows logo test or digital signature, be sure to click "Continue Anyway" or "Yes".

#### This completes the installation of the software.

- If you installed Button Manager, set up Button Manager as explained in "SETTING UP BUTTON MANAGER" (p.53).
- If you installed Sharpdesk, the Sharpdesk setup screen will appear. Follow the instructions in the screen to set up Sharpdesk.

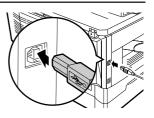

### INSTALLING THE SOFTWARE

### Connecting a USB cable

Follow the procedure below to connect the machine to your computer. A USB cable for connecting the machine to your computer is not included with the machine. Please purchase the appropriate cable for your computer.

| () Caution | <ul> <li>USB is available with a PC/AT compatible computer that was originally equipped with USB and had Windows 98, Windows Me, Windows 2000 Professional, Windows XP or Windows Vista preinstalled.</li> <li>Do not connect the USB cable before installing the printer driver. The USB cable should be connected during installation of the printer driver.</li> </ul>  |
|------------|--|
|            |  |
| Note       | <ul> <li>If the machine will be connected using a USB 2.0 port of your computer, please purchase a USB cable that supports USB 2.0.</li> <li>To obtain the fastest USB 2.0 data transfer speed, "USB2.0 MODE SWITCH" in the machine's user programs must be set to "HI-SPEED". For more information, see "USER PROGRAMS" (p.66).</li> <li>Use the machine's "HI-SPEED" mode only when using a computer that is running Windows 2000/XP/Vista.</li> <li>Even when the Microsoft USB 2.0 driver is used, it may not be possible to obtain full USB 2.0 speed if a PC card supporting USB 2.0 is used. To obtain the latest driver (which may enable a higher speed), contact the manufacturer of your PC card.</li> <li>Connection is also possible using a USB 1.1 port on your computer. However, the specifications will be USB 1.1 specifications (Full-Speed).</li> </ul> |

# **1** Insert the cable into the USB connector on the machine.

Insert the other end of the cable into your computer's USB port.

### Using the machine as a network printer

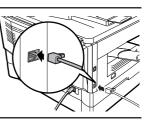

### Note

- Interface cables for connecting the machine to your computer are not included with the machine. Please purchase the appropriate cable for your computer.
  - If you intend to use the machine as a scanner, it must be connected to your computer with a USB interface cable. The scanner function cannot be used if the machine is connected with a LAN cable.

# Insert the LAN cable into the LAN connector on the machine.

Use a network cable that is shielded.

### Turn on the machine.

### Insert the CD-ROM into your computer's CD-ROM drive.

- 4 Click the "start" button, click "My Computer" (), and then double-click the CD-ROM icon ().
  - In Windows Vista, click the "Start" button, click "Computer", and then double-click the CD-ROM icon.
  - In Windows 98/Me/2000, double-click "My Computer", and then double-click the CD-ROM icon.
  - Double-click the "setup" icon (🕵).

In Windows Vista, if a message screen appears asking you for confirmation, click "Allow".

# **6** The "SOFTWARE LICENSE" window will appear. Make sure that you understand the contents of the software license, and then click the "Yes" button.

Note

You can show the "SOFTWARE LICENSE" in a different language by selecting the desired language from the language menu. To install the software in the selected language, continue the installation with that language selected.

#### Read the "Readme First" in the "Welcome" window and then click the "Next" button.

To set the IP address of the machine, follow the steps below. If the machine is already connected to the network and its IP address has been set, go to "LPR (TCP/IP) direct printing" (p.49).

#### **INSTALLING THE SOFTWARE**

#### Set the IP Address

### Sharing the printer using windows networking

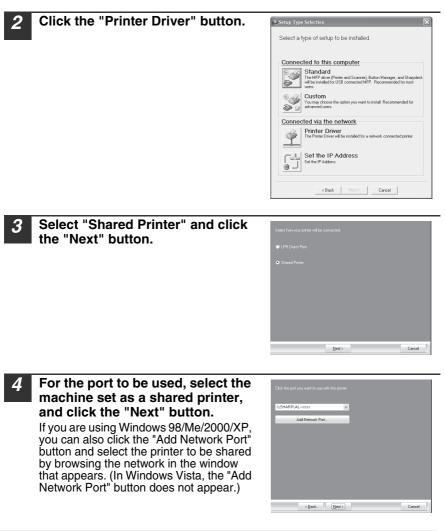

If the machine will be used as a shared printer on a network, follow these steps to install the printer driver in the client computer.

To configure the appropriate settings in the print server, see the operation manual or help file of your operating system.

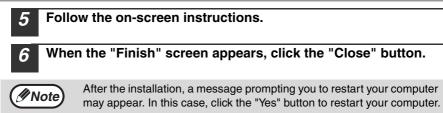

# Perform steps 3 through 7 in "Using the machine as a network printer" (p.47).

If the shared printer does not appear in the list, check the settings in the printer server.

This completes the installation of the software.

### SETTING UP BUTTON MANAGER

Button Manager is a software program that works with the scanner driver to enable scanning from the machine.

To scan using the machine, Button Manager must be linked with the scan menu on the machine. Follow the steps below to link Button Manager to scanner events.

### Windows XP/Vista

- 1 Click the "start" button, click "Control Panel", click "Printers and Other Hardware", and then click "Scanners and Cameras". In Windows Vista, click the "Start" button, select "Control Panel" and click "Hardware and Sound", and then click "Scanners and Cameras".
- 2 Click the "SHARP AL-XXXX" icon and select "Properties" from the "File" menu.

In Windows Vista, select "Properties" from the "Organize" menu.

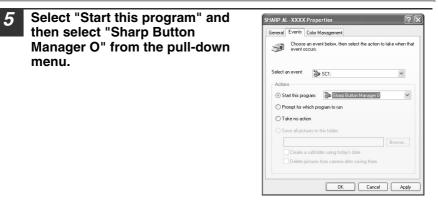

In the "Properties" screen, click the "Events" tab.

4 Select "SC1:" from the "Select an event" pull-down menu.

#### INSTALLING THE SOFTWARE

# Repeat Steps 4 through 6 to link Button Manager to "SC2:" through "SC6:".

Select "SC2:" from the "Select an event" pull-down menu. Select "Start this program", select "Sharp Button Manager O" from the pull-down menu, and then click the "Apply" button. Do the same for each ScanMenu through "SC6:".

When the settings have been completed, click the "OK" button to close the screen.

Button Manager is now linked to the scan menu (1 through 6).

The scan settings for each of scan menu 1 through 6 can be changed with the setting window of Button Manager.

For the factory default settings of the scan menu and the procedures for configuring Button Manager settings, see "Button Manager Settings" in the Online Manual.

### Windows 98/Me/2000

Click the "Start" button, select "Settings", and then click "Control Panel".

Double-click the "Scanners and Cameras" icon.

If the "Scanners and Cameras" icon does not appear in Windows Me, click "view all Control Panel options".

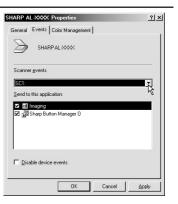

#### Select "SHARP AL-XXXX" and click the "Properties" button.

In Windows Me, right click "SHARP AL-XXXX" and click "Properties" in the pop-up menu.

In the "Properties" screen, click the "Events" tab.

| 5 | Select "SC1:" from the "Scanner |
|---|---------------------------------|
|   | events" pull-down menu.         |

#### INSTALLING THE SOFTWARE

| Select "Sharp Button Manager O"<br>in "Send to this application". | SHARP AL-XXXX Properties 21X<br>General Events Color Management                    |
|---|--|
|   | SHARPAL 2000C  |
|   | SGI: ▼<br>Send to this application:<br>■ dl Imaging<br>▼ dl Starp Button Manader 0 |
|   |  |
|   | Disable device events  |
|   | OK Cancel Apply  |

If other applications are shown, deselect the checkboxes for the other applications and leave only the Button Manager checkbox selected.

6

#### Click the "Apply" button.

# 8 Repeat Steps 5 through 7 to link Button Manager to "SC2:" through "SC6:".

Select "SC2:" from the "Scanner events" pull-down menu. Select "Sharp Button Manager O" in "Send to this application" and click the "Apply" button. Do the same for each ScanMenu through "SC6:".

When the settings have been completed, click the "OK" button to close the screen.

Button Manager is now linked to the scan menu (1 through 6).

The scan settings for each of scan menus 1 through 6 can be changed with the setting window of Button Manager.

For the factory default settings of the scan menu and the procedures for configuring Button Manager settings, see "Button Manager Settings" in the Online Manual.

# 6 Chapter 6 PRINTER/SCANNER FUNCTIONS

The machine includes a USB connector and a LAN connector as standard equipment.

When the USB connector is used, the printer and scanner functions can be used. When the LAN connector is used, the printer function can be used.

The machine has the following features:

- · High-speed data transfer (when connected to a USB 2.0 connector)
- ROPM\* function
- \* ROPM is an acronym for "Rip Once Print Many" processing. The ROPM function stores multiple pages of print data in memory before printing. When printing multiple copies, this eliminates the need for the computer to repeatedly transmit the print data.

To use the machine as a printer or scanner, the printer driver or scanner driver must first be installed as explained in the "INSTALLING THE SOFTWARE".

- If a problem occurs in printer or scanner mode, see the Online Manual.
- When using USB 2.0 (Hi-Speed mode), be sure to read "System requirements for USB 2.0 (Hi-Speed mode)" (below) to verify that your system and the machine settings are configured appropriately.

### System requirements for USB 2.0 (Hi-Speed mode)

The following system is required to use USB 2.0 (Hi-Speed mode):

- Your computer must be running Windows 2000 Professional/XP/Vista and the Microsoft USB 2.0 driver must be installed.
- The "USB 2.0 MODE SWITCH" setting in the machine's user programs must be set to "HI-SPEED". To change the setting, see "USB 2.0 MODE SWITCH" in the user programs (p.66).
- \* Even when the Microsoft USB 2.0 driver is installed, some USB 2.0 expansion cards are not capable of attaining the speed stipulated by the Hi-Speed standard. This problem can often be fixed by installing a more recent driver for the card. To obtain the most recent driver for your card, contact the card's manufacturer.

6

### USING THE PRINTER MODE

The procedure for loading paper for printing is the same as for loading copy paper. See "LOADING PAPER" (p.18).

| Note                         | <ul> <li>Print jobs received while the machine is copying will be stored in memory. When the copy job is finished, the print jobs will begin printing.</li> <li>Printing is not possible when the front or side cover is opened for machine maintenance, or when a misfeed occurs or the machine runs out of paper or toner, or when the drum cartridge reaches its replacement time.</li> </ul> |  |
|------------------------------|--|--|
| BASIC PROCEDURE FOR PRINTING |  |  |

The basic procedure for printing is explained in the following. To use convenient printer functions, see the "Online Manual" or the printer driver help file.

Make sure that paper is loaded in the tray.

The procedure for loading paper is the same as for copying. See "LOADING PAPER" (p.18) and make sure that the paper you wish to use is loaded.

Note

Make sure that the paper size setting on the machine is the same as the paper size set in the printer driver.

**3** Make sure that the printer driver for the machine is selected, and select print settings in the printer driver.

For information on the settings in the printer driver, see the "Online Manual" or the printer driver help file.

**4** Click the "Print" button or the "OK" button to begin printing.

The print job will be delivered to the paper output tray.

### Canceling a print job

**1** Select printer mode with the [MODE SELECT] key on the operation panel of the machine, and then press the [CLEAR] key ((C)) or the [CLEAR ALL] key ((A)).

"CANCEL PRINT JOB?" will appear in the display. Make sure that a checkmark appears in front of "YES" and press the [ENTER] key.

For limitations on copying in print mode, scanner mode limitations, and print mode limitations in copy and scanner mode, see "OPERATION IN COPY, PRINTER, AND SCANNER MODES" (p.60).

### **USING THE SCANNER MODE**

The procedure for placing the original is the same as for copying. See "NORMAL COPYING" (p.24).

- The tray paper size is being set.
- The machine is being used in copy mode.
- The front cover or side cover is open.

### SCANNING USING THE KEYS ON THE MACHINE

When scanning is performed by this method, the application that has been set in Button Manager will automatically start and the scanned image will be pasted into the application.

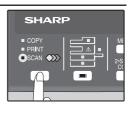

If the machine is in copy mode, press the [MODE SELECT] key to switch to scanner mode and clear the previously set copy settings.

### Scanning from the operation panel of the machine

# Press the [MODE SELECT] key to select scanner mode.

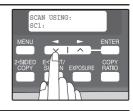

The "SCAN" indicator lights up to indicate that scanner mode is selected.

#### Place the original. (p.24)

3 Press the [◄] key (□) or [►] key (□) to select the desired Button Manager scan menu setting.

#### Press the [START] key ( $\bigcirc$ ) to begin scanning.

Scanner mode remains selected after scanning is finished. (To change to a different mode, use the [MODE SELECT] key.)

### **PRINTER/SCANNER FUNCTIONS**

### Button Manager scan menu

For information on Button Manager settings, see the Button Manager help file. The names in the Button Manager menu ("xxxx" in "SC1:xxxx", etc.) can be changed. See the online manual.

### SCANNING FROM YOUR COMPUTER

The machine supports the TWAIN standard, making it possible to scan from TWAINcompliant applications. The machine also supports WIA (Windows Image Acquisition), making it possible to scan from the "Scanner and Camera Wizard" in Windows XP. See the Online Manual for the procedures for TWAIN and WIA scanning. For information on TWAIN and WIA settings, see the help file for the scanner driver or Windows Help.

### OPERATION IN COPY, PRINTER, AND SCANNER MODES

Scanning Scanning Modes Copying Printing from the from a computer machine Copy key input Yes Yes Yes No Copy During copying No No No Yes\*3 Yes\*3 **During printing** Yes\*1 Printer Scanner During scan preview/ Yes\*2 No during scanning

Some operations cannot be performed simultaneously when the machine is being used in printer mode, copy mode, or scanner mode.

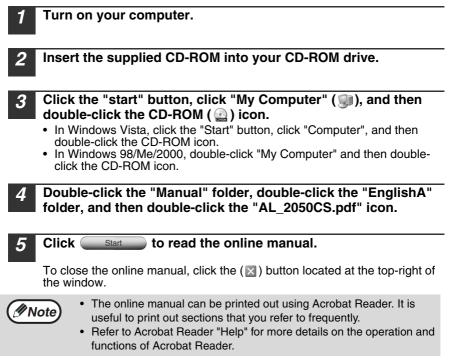

\*<sup>1</sup> During two-sided printing, the copy job begins after the print job finishes.

\*<sup>2</sup> Printing is possible while scanning is taking place. Printing begins after scanning ends when connected by the LAN connector.

\*<sup>3</sup> Scanning begins after printing ends when connected by the LAN connector and two-sided printing is taking place.

### HOW TO USE THE ONLINE MANUAL

The online manual provides detailed instructions for operating the unit as a printer and scanner. It also provides methods for dealing with printing or scanner problems.

### Viewing the online manual

The "CD-ROM" that accompanies the machine contains an online manual in PDF format. To view the manual in PDF format, Acrobat Reader or Adobe Reader of Adobe Systems Incorporated is required. If neither program is installed on your computer, the programs can be downloaded from the following URL:

http://www.adobe.com/

Chapter 7 USER SETTINGS

The user settings allow you to customize machine settings to better meet your needs.

### **USER PROGRAMS**

The user settings consist of the following items. To change a user program setting, see "SELECTING A SETTING FOR A USER PROGRAM" (p.67).

### Copy mode

| Program<br>number | Program name  | Setting codes<br>(factory default<br>setting appears<br>in bold)                               | Explanation  |

| Program<br>number | Program name          | Setting codes<br>(factory default<br>setting appears<br>in bold)           | Explanation  |
|-------------------|-----------------------|--|--|
| 4                 | AUTO SHUT-OFF<br>TIME | <b>1: 5 MIN.</b><br>2: 30 MIN.<br>3: 60 MIN.<br>4: 120 MIN.<br>5: 240 MIN. | <ul> <li>This function automatically<br/>switches the machine to a state<br/>that consumes even less power<br/>than preheat mode if the set<br/>duration of time elapses without<br/>the machine being used when<br/>the power is on. All lights except<br/>the power save indicator go off.<br/>To resume normal operation,<br/>press the [START] key ( ).<br/>Normal operation also resumes<br/>automatically when a print job is<br/>received or scanning is begun<br/>from a computer. While in auto<br/>power shut-off mode, no keys<br/>(except the [START] key ( ))<br/>can be used.</li> </ul> |
| 7                 | LAYOUT IN 2IN1        | 1: PATTERN 1<br>2: PATTERN 2   | <ul> <li>Use this setting to select the<br/>layout pattern when two original<br/>pages are copied onto a single<br/>sheet of paper (see page 35 for<br/>the layout patterns).</li> </ul>   |
| 8                 | OFFSET<br>FUNCTION    | 1: ON<br>2: OFF  | • When enabled, this function<br>offsets the position of each<br>set of copies in the output tray<br>in copy mode, and each print<br>job in printer mode.  |
| 9                 | ROTATE ORIG.<br>IMAGE | 1: ON<br>2: OFF  | • When two-sided copying is performed, this function rotates the image on the back of the original. This is convenient when binding the copies at the top (tablet binding).  |
| 10                | AE/TEXT<br>RESOLUTION | <b>1: 300dpi</b><br>2: 600dpi  | • This setting is used to change<br>the copy resolution in AUTO and<br>TEXT mode from 600 x 300 dpi<br>to 600 x 600 dpi (high-quality<br>mode). Scanning is slower<br>when high-quality mode is used.  |

| Program<br>number | Program name         | Setting codes<br>(factory default<br>setting appears<br>in bold)      | Explanation  |
|-------------------|----------------------|---|--|
| 11                | 2-SIDED COPY<br>MODE | 1: HI-SPEED<br>2: NORMAL  | <ul> <li>If the memory fills up when<br/>two-sided copying is<br/>performed, "NORMAL" can be<br/>selected to make copying<br/>possible. However,<br/>"NORMAL" results in a slower<br/>copying speed. Normally "HI-<br/>SPEED" is selected to enable<br/>fast two-sided copying.</li> </ul>   |
| 12                | MARGIN WIDTH         | 1: 1/4"<br><b>2: 1/2"</b><br>3: 3/4"<br>4: 1"                         | <ul> <li>Use this setting to set the margin width.</li> </ul>  |
| 13                | Mem. For<br>Printer  | 1: 30%<br>2: 40%<br><b>3: 50%</b><br>4: 60%<br>5: 70%                 | <ul> <li>Use this to change the<br/>proportion of machine<br/>memory used for printer<br/>mode.</li> </ul>   |
| 14                | AUTO KEY<br>REPEAT   | 1: ON<br>2: OFF   | <ul> <li>Use this setting to select<br/>whether or not holding down a<br/>key causes repeated input of<br/>the key. For keys that normally<br/>cause a set value to decrease<br/>or increase when held down<br/>(for example, the [→] key<br/>(○) or [▶] key (○)), this<br/>program can be used to have<br/>the set value not change<br/>when the key is held down.</li> </ul> |
| 15                | KEY PRESS TIME       | 1: NORMAL<br>2: 0.5 SEC.<br>3: 1.0 SEC.<br>4: 1.5 SEC.<br>5: 2.0 SEC. | <ul> <li>Use this setting to select how<br/>long a key must be pressed<br/>for the input to be accepted.<br/>By selecting a longer time,<br/>you can prevent settings from<br/>being changed by the<br/>accidental pressing of a key.</li> </ul>   |
| 16                | KEY TOUCH<br>SOUND   | 1: LOW<br>2: HIGH<br>3: OFF   | This sets the volume of beep signals. (p.68)   |
| 17                | SOUND AT<br>DEFAULT  | 1: ON<br>2: OFF   | <ul> <li>Use this to sound a beep<br/>when a base setting is<br/>selected. (p.68)</li> </ul>   |
| 18                | TONER SAVE<br>MODE   | 1: ON<br>2: OFF   | • This mode reduces toner<br>usage by about 10% when<br>copying. Toner save mode is<br>effective when the exposure<br>mode is AUTO or TEXT.  |

| Program<br>number | Program name        | Setting codes<br>(factory default<br>setting appears<br>in bold)  | Explanation  |
|-------------------|---------------------|---|--|
| 19                | AE LEVEL ADJUST     | 1: SPF/RSPF<br>(Adjustment to<br>5 levels is<br>possible.)<br>2: DOCUMENT<br>GLASS<br>(Adjustment to<br>5 levels is<br>possible.) | <ul> <li>This is used to adjust the exposure level.</li> <li>The automatic exposure level can be adjusted separately for the document glass and the RSPF.</li> <li>For the procedure for adjusting the exposure and guidelines for numeric values, see page 28. The factory default setting for the exposure level is center.</li> </ul> |
| 20                | LANGUAGE            | 1: AMERICAN<br>ENGLISH<br>2: ENGLISH<br>3: FRENCH<br>4: SPANISH   | <ul> <li>This is used to set the<br/>language used in the display.</li> </ul>  |
| 21                | RESET FACTORY       | 1: YES<br>2: NO   | • This is used to return all settings to the factory default settings.   |
| 22                | SORT AUTO<br>SELECT | 1: ON<br>2: OFF   | Use this setting to enable or<br>disable sort auto select mode.  |
| 24                | CHECK RSPF<br>OPEN  | <b>1: ON</b><br>2: OFF  | <ul> <li>You can set the operation that<br/>takes place if the [START] key<br/>(</li></ul>   |
| 25                | VALID COPY<br>WIDTH | <b>1: 8.5x11</b><br>2: 5.5x8.5  | • Set the allowed paper sizes<br>for copying from the bypass<br>tray. When "5.5x8.5" is<br>selected, a copy of a letter<br>size original will only be<br>printed up to invoice size.   |
| 28                | LSU SETTING         | 1: ON<br>2: OFF   | <ul> <li>Select whether copying is only<br/>allowed when the polygon<br/>motor is rotating, or also when<br/>the polygon motor is stopped.</li> </ul>  |
| 29                | PAPER TYPE          | 1: PLAIN PAPER<br>2: HEAVY PAPER  | • Set the temperature of the fusing unit when the bypass tray is used.   |
| 30                | DISPLAY<br>CONTRAST | 1: LIGHTER<br>2: LIGHT<br><b>3: NORMAL</b><br>4: DARK<br>5: DARKER  | <ul> <li>Set the contrast of the display.</li> </ul>   |

### Print mode

| Program<br>number | Program name            | Setting codes<br>(factory default<br>setting appears<br>in bold) | Explanation  |
|-------------------|-------------------------|--|--|
| 1                 | FORCED<br>OUTPUT        | 1: ON<br><b>2: OFF</b>   | • When this function is enabled,<br>printing in printer mode will<br>automatically continue using a<br>different size of paper if the<br>specified size of paper runs<br>out in all trays. This feature<br>does not function in copy<br>mode.  |
| 2                 | USB 2.0 MODE<br>SWITCH* | <b>1: FULL-SPEED</b><br>2: HI-SPEED                              | <ul> <li>This sets the USB 2.0 data<br/>transfer speed. To obtain the<br/>fastest speed when using the<br/>USB 2.0 connector, first verify<br/>that your computer meets the<br/>system requirements<br/>(operating system and driver),<br/>and then use this program to<br/>change the USB 2.0 mode to<br/>"Hi-Speed". Note that the<br/>setting should not be changed<br/>while running a TWAIN driver.<br/>(For the system requirements,<br/>see "System requirements for<br/>USB 2.0 (Hi-Speed mode)"<br/>(p.57).)</li> </ul> |
| 3                 | AUTO TRAY<br>SWITCH     | 1: ON<br>2: OFF  | <ul> <li>If the paper runs out during<br/>printing and there is paper of<br/>the same size in another tray,<br/>this function automatically<br/>switches to that tray<br/>(excluding the bypass tray).<br/>The function can be disabled.</li> </ul>  |

\* The scanning speed increases when the USB 2.0 mode is set to "HI-SPEED", however, the printing speed does not increase considerably.

### **SELECTING A SETTING FOR A USER PROGRAM**

[ENTER] key.

2 Press the [◄] key (□) or [►] key (□) to select the item that you wish to configure in the USER PROGRAM items, and then press the [ENTER] key.

Press the [MENU] key and then press the

In printer mode, the user programs are accessed

by simply pressing the [MENU] key.

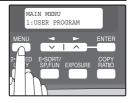

- See "USER PROGRAM" (p.62 to p.66) for the program name and program code.
- You can also select a program by directly entering the program number with the numeric keys.
- Press the [→] key (□) or [▶] key (□) to change the setting of the selected item. See "USER PROGRAM" (p.62 to p.66) for the program code.
  - If you mistakenly select the wrong item, press the [CLEAR] key ((C)) and repeat the procedure from step 2.
  - To cancel a setting for a user program, press the [MENU] key.

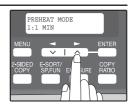

### Press the [ENTER] key.

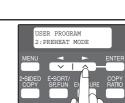

Your selection appears briefly and then the previous screen appears.

When "AE LEVEL ADJUST" is selected in the user programs and the [ENTER] key is pressed, the automatic exposure adjustment screen appears. Adjust the exposure and press the [ENTER] key.

| Audible signals (key entry beep, invalid key beep, base setting beep)<br>The machine sounds three different types of beep signals: a key entry beep that<br>sounds when a valid key is pressed, an invalid key beep that sounds when an<br>invalid key is pressed, and a base setting beep that sounds when a setting is the<br>same as the base setting (base settings are explained below). The base setting<br>beep is initially disabled. If you wish to enable the base setting beep, see<br>"SOUND AT DEFAULT" on page 64. If you wish to change the volume of the beep<br>signals or disable them, see "KEY TOUCH SOUND" on page 64.<br>The beep patterns of each type of beep signal are as follows: |   |  |  |
|--|---|--|--|
| Key entry beepOne beep<br>Base setting beep Three beeps  | Invalid key beep Two beeps                      |  |  |
| <b>Base settings</b><br>The base settings are preset standard selections for each copy setting. The base settings are as follows:  |   |  |  |
| Copy ratio   | Paper feed locationTray 1<br>(Upper paper tray) |  |  |

AUTO/TEXT/PHOTO

# 8 Chapter 8 TROUBLESHOOTING AND MAINTENANCE

Problems related to general use of the machine, the copy function, and software setup are explained here. Be sure to check the problem carefully before calling for service, as many problems can be solved by the user.

If you are unable to solve the problem, turn off the main switch, unplug the power cord from the outlet, and contact your dealer.

For problems related to the printer and scanner functions, see the online manual.

### DISPLAY MESSAGES

When the following indicators light up or blink on the operation panel or the following alphanumeric codes appear in the display, solve the problem immediately referring to both the table below and the indicated page.

Be sure to use only genuine SHARP parts and supplies.

| Indication                    |        | ation  | Cause and remedy   | Page |
|-------------------------------|--------|--|--|------|
| Lamp indicator Display        |        | Display  | Cause and remedy   |      |

# PROBLEMS DURING SETUP OF THE SOFTWARE

If the software does not install correctly, check the following items on your computer. To remove the software, see "Removing the software" (p.77).

# MFP driver cannot be installed (Windows 2000/XP)

If the MFP driver cannot be installed in Windows 2000/XP, follow these steps to check your computer's settings.

#### Click the "start" button and then click "Control Panel".

In Windows 2000, click the "Start" button, select "Settings", and then click "Control Panel".

**2** Click "Performance and Maintenance", and then click "System".

In Windows 2000, double-click the "System" icon.

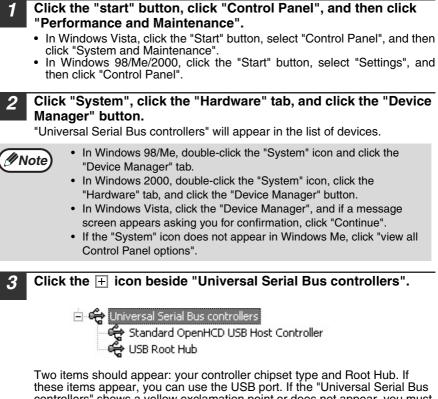

- **3** Click the "Hardware" tab and then click the "Driver Signing" button.
- 4 Check "What action do you want Windows to take?" ("File signature verification" in Windows 2000).

If "Block" has been selected, it will not be possible to install the MFP driver. Select "Warn" and then install the MFP driver as explained in "INSTALLING THE SOFTWARE".

| river Signing Options  |
|--|
| During hardware installation, Windows might detect software that<br>as not passed Windows Logo testing to verify its compatibility with<br>Windows. (Tell me why this testing is important.) |
| What action do you want Windows to take?   |
| ○ Ignore - Install the software anyway and don't ask for my approval   |
| (a) Warn - Prompt me each time to choose an action   |
| O Block - Never install unsigned driver software   |
| Administrator option   |
| Make this action the system default  |
| OK Carrel  |
|  |

# Plug and play screen does not appear (USB only)

If the Plug and Play screen does not appear after you connect the machine to your computer with a USB cable and turn on the machine, follow the steps below to verify that the USB port is available.

these items appear, you can use the USB port. If the "Universal Serial Bus controllers" shows a yellow exclamation point or does not appear, you must check your computer manual for USB troubleshooting or contact your computer manufacturer.

Δ

# The MFP driver cannot be correctly installed by Plug and Play (Windows 2000/XP/Vista) (USB only)

In Windows 2000/XP/Vista, if the MFP driver cannot be correctly installed by Plug and Play (for example, Plug and Play takes place without copying the required files for the MFP driver installation), follow these steps to remove unneeded devices and then install the MFP driver as explained in "INSTALLING THE SOFTWARE" (p.40).

# Click the "start" button, click "Control Panel", and then click "Performance and Maintenance".

- In Windows Vista, click the "Start" button, select "Control Panel", and then click "System and Maintenance".
- In Windows 2000, click the "Start" button, select "Settings", and then click "Control Panel".

- In Windows 2000, double-click the "System" icon, click the "Hardware" tab, and click the "Device Manager" button.
  - In Windows Vista, click the "Device Manager", and if a message screen appears asking you for confirmation, click "Continue".

# Click the $\pm$ icon beside "Other devices".

If "AL-XXXX" and "SHARP AL-XXXX" appear, select and delete both of these items.

If "Other devices" does not appear, close the "Device Manager" window.

∕∕∕∕Note

∕∕∕Note

# Install the software as explained in "INSTALLING THE SOFTWARE".

#### Removing the software

If you need to remove the software, follow these steps.

#### Click the "start" button and then click "Control Panel".

In Windows 98/Me/2000, click the "Start" button, select "Settings", and then click "Control Panel".

- 2 Click "Add or Remove Programs".
  - In Windows Vista, click the "Uninstall a program".
  - In Windows 98/Me/2000, double-click the "Add/Remove Programs" icon.
  - Select "SHARP AL-2050/2060 Series MFP Driver" and Button Manager from the list, and remove the software.

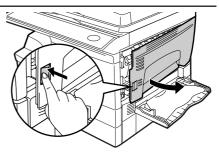

For more information, refer to your operating manual or to the help files for your operating system.

# MISFEED REMOVAL

When a misfeed occurs, the error indicator blinks, "CLEAR PAPER JAM" appears in the display, and the machine stops operating. If a misfeed occurs when using the RSPF, "RETURN X ORIGINAL(S) START TO RESUME" will appear in the display. ("X" indicates the number of pages to be returned.). This indicates the number of the originals that must be returned to the document feeder tray after a misfeed. Return the required number of originals. This number will be cleared when copying is resumed or the [CLEAR] key (C) is pressed. If an original misfeed occurs in the RSPF, the machine will stop and the error indicator will blink. To remove a misfeed from the RSPF, see "D: Misfeed in the RSPF" (p.81).

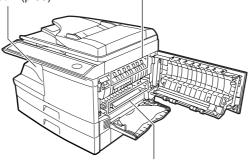

Open the bypass tray, and then open the side cover.

2 Check the misfeed location. Remove the misfed paper following the instructions for each location in the illustration below. If the error indicator blinks, proceed to "A: Misfeed in the paper feed area" (p.79).

If the misfed paper is seen from this side, proceed to "**C: Misfeed** in the transport area". (p.80) If paper is misfed here, proceed to "**B: Misfeed in the fusing area**". (p.79)

If paper is misfed here, proceed to "A: Misfeed in the paper feed area". (p.79)

# A: Misfeed in the paper feed area

Gently remove the misfed paper from the paper feed area as shown in the illustration. If the error indicator blinks and the misfed paper is not visible in the paper feed area, pull out the paper tray and remove the misfed paper. If the paper cannot be removed, proceed to "B: Misfeed in the fusing area".

Warning The fusing unit is hot. Do not touch the fusing unit when removing misfed paper. Doing so may cause a burn or other injury.

#### Do not touch the surface (green portion) of the drum cartridge when removing the misfed paper. Doing so may damage the drum and cause smudges on copies.

• If the paper has been fed through the bypass tray, do not remove the misfed paper through the bypass tray. Toner on the paper may stain the paper transport area, resulting in smudges on copies.

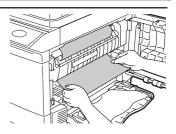

# B: Misfeed in the fusing area

Lower the fusing unit release lever.

# Fusing unit release lever

Gently remove the misfed paper from under the fusing unit as shown in the illustration. If the paper cannot be removed, proceed to "C: Misfeed in the transport area".

# Warning

The fusing unit is hot. Do not touch the fusing unit when removing misfed paper. Doing so may cause a burn or other injury.

- Do not touch the surface (green portion) of the drum cartridge when removing the misfed paper. Doing so may damage the drum and cause smudges on copies.
- Do not remove the misfed paper from above the fusing unit. Unfixed toner on the paper may stain the paper transport area, resulting in smudges on copies.
- **3** Raise the fusing unit release lever and then close the side cover by pressing the round projections near the side cover open button. The error indicator will go out and the ready indicator will light up.

#### C: Misfeed in the transport area

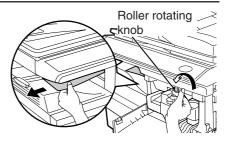

Lower the fusing unit release lever.

See "B: Misfeed in the fusing area" (p.79).

**2** Open the front cover.

To open the front cover, see "INSTALLING THE TD (TONER/ DEVELOPER) CARTRIDGE" (p.14).

**3** Rotate the roller rotating knob in the direction of the arrow and gently remove the misfed paper from the exit area.

Raise the fusing unit release lever, close the front cover and then close the side cover by pressing the round projections near the side cover open button. The error indicator will go out and the ready indicator will light up.

() Caution

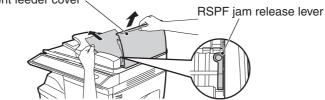

When closing the covers, be sure to close the front cover securely and then close the side cover. If the covers are closed in the wrong order, the covers may be damaged.

# **D: Misfeed in the RSPF**

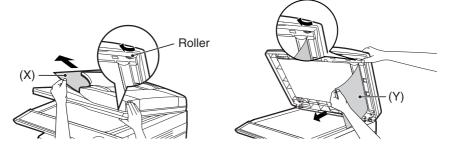

If the misfed original is at the top of the document feeder tray or in the exit area, follow procedure (A) to remove the misfeed. If the misfed original is inside the document feeder and is not visible, follow procedure (B).

(A) If the misfed original is at the top of the document feeder tray or in the exit area, open the document feeder cover and pull out the original. If the original resists your pulling, press down on the RSPF jam release lever while pulling out the original. When finished, close the document feeder cover.

Document feeder cover

(B) Open the document feeder cover. Next, open the RSPF and rotate the roller in the direction of the arrow. If the misfed original is in the state (X), pull the original out as it feeds out into the exit area. If the misfed original is in the state (Y), pull the original down and out. When finished, lower the RSPF and close the document feeder cover.

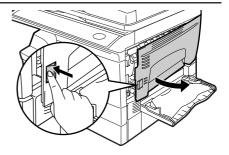

Open and close the RSPF to clear the error indicator. "RETURN X ORIGINAL(S) START TO RESUME" will appear in the display. Return the indicated number of pages to the document feeder tray. Press the [START] key ( ()) to resume copying.

# TD (TONER/DEVELOPER) CARTRIDGE REPLACEMENT

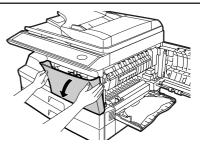

When toner is low, the error indicator will light up and "TD CARTRIDGE IS NEAR EMPTY." will appear in the display. For information on purchasing a new TD (Toner/ Developer) cartridge, see "ABOUT SUPPLIES AND OPTIONS" (p.90). If copying is continued while the indicator is lit, copies will gradually become lighter until the toner runs out. When the toner runs out, the machine will stop operating, the error indicator will blink, and "REPLACE THE TD CARTRIDGE" will appear in the display. Follow the procedure below to replace the TD (Toner/Developer) cartridge.

- After the machine stops, it may be possible to make a few more copies by taking the TD cartridge out of the machine, shaking it horizontally, then reinstalling it. If copying is not possible after this operation, replace the TD cartridge.
- During a long copy run of a dark original, "TONER REPLENISHMENT IN PROGRESS" appears in the display, and the machine may stop even though toner is left. The machine will feed toner up to 2 minutes and then the ready indicator will light up. Press the [START] key ( ) to resume copying.
- **1** Open the bypass tray, and then open the side cover while pressing the side cover open button.

2 Push gently on both sides of the front cover to open the cover.

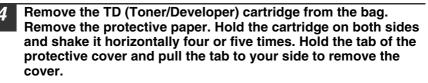

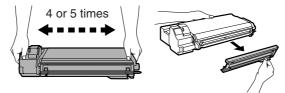

# **3** Gently pull the TD (Toner/Developer) cartridge out while pressing the lock release button.

//Note

- After removing the TD cartridge, do not shake it or tap on it. Doing so may cause toner to leak from the cartridge. Put the old cartridge immediately in the bag contained in the box of the new cartridge.
  - Dispose of the old TD cartridge in accordance with local regulations.

5 While pushing the lock release button, gently insert the TD (Toner/ Developer) cartridge until it locks into place.

6 Close the front cover and then the side cover by pressing the round projections near the side cover open button. The error indicator will go out and the ready indicator will light up.

When closing the covers, be sure to close the front cover securely and then close the side cover. If the covers are closed in the wrong order, the covers may be damaged.

# DRUM CARTRIDGE REPLACEMENT

The useful life of the drum cartridge is approximately 18,000 copies\*. When the internal counter reaches approximately 17,000 copies, the error indicator will light up and "A DRUM CARTRIDGE WILL BE NEEDED SOON" will appear in the display. For more information on purchasing a drum cartridge, see "ABOUT SUPPLIES AND OPTIONS" (p.90). When the error indicator blinks and "REPLACE THE DRUM CARTRIDGE" appears in the display, the machine will stop operating until the cartridge is replaced. Replace the drum cartridge at this time.

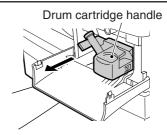

\* Based on copying onto letter size paper at 5% toned area.

Do not remove the protective cover on the drum portion (black paper) of a new drum cartridge before use. The cover protects the drum against external light.

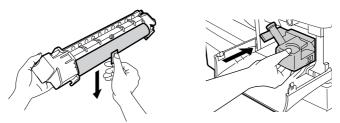

Remove the TD (Toner/Developer) cartridge (see "TD (TONER/ DEVELOPER) CARTRIDGE REPLACEMENT" (p.82)). 2 Hold the drum cartridge handle and gently pull the cartridge out. Dispose of the old drum cartridge in accordance with local regulations.

# **3** Remove the new drum cartridge from the protective bag and remove the protective cover from the cartridge. Gently install the new drum cartridge.

Do not touch the surface of the drum (green portion). Doing so may cause smudges on the copies.

- **4** Gently install the TD (Toner/Developer) cartridge. To install the TD cartridge, see "INSTALLING THE TD (TONER/DEVELOPER) CARTRIDGE" (p.14).
- **5** Close the front cover and then the side cover by pressing the round projections near the side cover open button. The drum replacement required error indicator will go out and the ready indicator will light up.

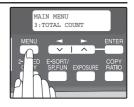

When closing the covers, be sure to close the front cover securely and then close the side cover. If the covers are closed in the wrong order, the covers may be damaged.

# CHECKING THE TOTAL COUNT AND DRUM CARTRIDGE LIFE

You can check the total number of pages output by the machine (all pages printed by the copy function and printer function), as well as the output counts of each function (number of copies, number of scanned pages, etc.) and drum cartridge life. When a count reaches 999,999 it returns to 0.

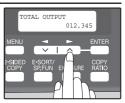

Press the [MENU] key. Press the  $[\neg ]$  key  $( \Box )$  or  $[\frown ]$  key  $( \Box )$  until "TOTAL COUNT" appears, and then press the [ENTER] key.

Press the  $[\neg]$  key  $(\Box)$  or  $[\blacktriangleright]$  key  $(\Box)$  to display the count of each function.

The count of each function changes as follows each the [ $\blacktriangleleft$ ] key ( $\Box$ ) or [ $\blacktriangleright$ ] key ( $\Box$ )is pressed:

- "TOTAL OUTPUT":
- "COPIES":"SPF/RSPF":

PRINTS:

"SCAN SEND":

- "SPF/RSPF": Total number of pages scanned using the RSPF
   "2-SIDED PRINT": Total number of pages printed by two-side
  - Total number of pages printed by two-sided print

Total number of pages output by the machine

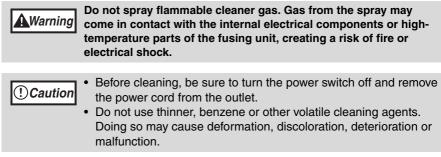

- Total number of pages printed the printer function
- Total number of scans

Total number of copies

• "REMAINING DRUM LIFE": The remaining number of pages that can be printed with the drum cartridge is displayed.

# **CLEANING THE MACHINE**

Proper care is essential in order to get clean, sharp copies. Be sure to take a few minutes to clean the machine on a regular basis.

# Cabinet

Wipe the cabinet with a soft, clean cloth.

# Document glass and the back side of the RSPF

Stains on the glass, RSPF scanning window, cover or RSPF roller will also be copied. Wipe the glass, RSPF scanning window, cover and RSPF roller with a soft, clean cloth. If necessary, dampen the cloth with a glass cleaner.

Document glass/scanning window

RSPF

If this area is dirty, copying from the RSPF will not be possible.

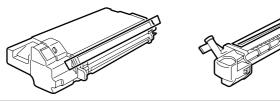

# TD (Toner/Developer) cartridge and drum cartridge

- **1** Remove the TD (Toner/Developer) cartridge and drum cartridge as explained in "TD (TONER/DEVELOPER) CARTRIDGE REPLACEMENT" (p.82) and "DRUM CARTRIDGE REPLACEMENT" (p.84).
- 2

() Caution

Wipe the parts of the TD (Toner/Developer) cartridge and drum cartridge shown below with a clean cloth.

Wipe only the parts that are indicated in the illustration.

- Do not touch the surface of the drum (green portion). Doing so may cause smudges on the copies.
- When cleaning the TD cartridge, do not tilt or shake it. Toner may spill out and soil your clothes.

**3** Replace the TD (Toner/Developer) cartridge and drum cartridge as explained in "TD (TONER/DEVELOPER) CARTRIDGE REPLACEMENT" (p.82) and "DRUM CARTRIDGE REPLACEMENT" (p.84).

If copies start becoming streaky or blotchy, the transfer charger may be dirty. Clean the charger using the following procedure.

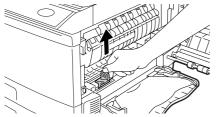

#### **Transfer charger**

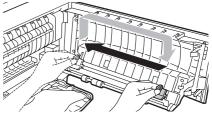

- Turn the power switch off. (p.17)
- Ensure that the bypass tray is open and then open the side cover while pressing the side cover open button. (p.14)
- **3** Take the charger cleaner out by holding the tab. Set the charger cleaner onto the right end of the transfer charger, gently slide the cleaner to the left end, and then remove it. Repeat this operation two or three times.

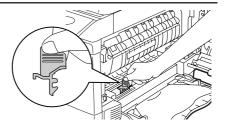

5

Slide the charger cleaner from the right end to the left end along the groove of the transfer charger. If the cleaner is stopped on the way, smudges on copies may occur.

**4** Return the charger cleaner to its original position. Close the side cover by pressing the round projections near the side cover open button.

Turn the power switch on. (p.16)

# **ABOUT SUPPLIES AND OPTIONS**

When ordering supplies, please use the correct part numbers as listed below.

Be sure to use only genuine SHARP parts and supplies.

For best copying results, be sure to use only SHARP Genuine Supplies which are designed, engineered, and tested to maximize the life and performance of SHARP copiers. Look for the Genuine Supplies label on the toner package.

# Supply list

| Supply                            | Part number | Usable life           |
|-----------------------------------|-------------|-----------------------|
| TD (Toner/Developer)<br>cartridge | AL-110TD    | Approx. 4,000 sheets  |
| Drum cartridge                    | AL-100DR    | Approx. 18,000 sheets |

Based on copying onto letter-type paper at 5% toned area (The life of the TD cartridge which has been included in the machine at the factory is approximately 2,000 sheets.)

## Interface cable

Please purchase the appropriate cable for your computer.

#### **USB** interface cable

USB cable that supports USB 2.0.

#### LAN interface cable

Shielded type cable.

<sup>\*1</sup>When making multiple duplex copies, the copy speed will vary based on the environment conditions.

\*<sup>2</sup>The first-copy time is measured after the power save indicator turns off following power on, using the document glass with the polygon rotating in the copy ready state and "LSU SETTING" set to ON in the user programs (8-1/2" x 11", paper fed from paper tray).

The first-copy time may vary depending on machine operating conditions and ambient conditions such as temperature.

The time from power on until the first copy is output varies depending on the installation site and the state of the machine in use.

- \*<sup>3</sup>The warm-up time may vary depending on machine operating conditions and ambient conditions such as temperature.
- \*<sup>4</sup>Not including TD and drum cartridges.

#### IMPORTANT SERVICE INFORMATION (U.S.A. only)

#### If a Problem Occurs

Most operational questions can be answered by referring to the Operation Manual or Online Manual. Also, for your convenience, you will find answers to frequently asked questions on our website at <u>www.sharpusa.com</u>. You can also e-mail your service question to

www.digitalcopiersupport@sharpsec.com. Should you require further assistance, call Sharp at 1-630-378-3590. A Customer Relations Specialist will assist you. Before your call, please be ready to provide the model number of your Product, Serial Number, Date of Purchase, description of the problem, and a valid Credit Card Number (should it be required).

#### How Warranty Repair Service is Obtained

Our Customer Relations Specialists at 1-630- 378-3590 will explain how to obtain warranty repair service. **Please be sure to retain the original packaging materials in order to facilitate shipment.** The shipment of the defective unit will be at your expense; please be sure it is insured and packaged securely. Upon repair of your unit, Sharp will promptly return it to you at any U.S. location.

#### What You Must Do

Your Product is designed to perform with a minimum amount of user maintenance. However, you are responsible for the required user maintenance described in the Operation Manual. This requires user maintenance including replacement of the TD cartridge and drum cartridge, cleaning of the unit and transfer charger, removal of dust and foreign matter, clearing of paper misfeeds, and proper routine and preventive maintenance.

#### Service After Expiration of Warranty Coverage

Should you require service repair after warranty coverage has expired, contact Sharp at 1-630-378-3590 for information.

#### END-USER LIMITED WARRANTY (Valid in U.S.A. only)

SHARP ELECTRONICS CORPORATION warrants to the first end-user purchaser that this Sharp brand product (the "Product"), when shipped in its original container, will be free from defective workmanship and materials, and agrees that it will, at its option, either repair the defect or replace the defective Product or part thereof with a new or remanufactured equivalent at no charge to the purchaser for parts or labor for the period(s) set forth below.

This warranty does not apply to any appearance items of the Product nor to the additional excluded item(s) set forth below nor to any Product the exterior of which has been damaged or defaced, which has been subjected to improper voltage or other misuse, abnormal service or handling, or which has been altered or modified in design or construction.

In order to enforce the rights under this limited warranty, the purchaser should follow the steps set forth below and provide proof of purchase to the servicer.

To the extent permitted by applicable state law, the warranties set forth herein are in lieu of, and exclusive of, all other warranties, express or implied. Specifically, ALL OTHER WARRANTIES OTHER THAN THOSE SET FORTH ABOVE ARE EXCLUDED. ALL EXPRESS AND IMPLIED WARRANTIES INCLUDING THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR USE, AND FITNESS FOR A PARTICULAR PURPOSE ARE SPECIFICALLY EXCLUDED. If, under applicable state law, implied warranties may not validly be disclaimed or excluded, the duration of such implied warranties is limited to the period(s) from the date of purchase set forth below.

Neither the sales personnel of the seller nor any other person is authorized to make any warranties other than those described herein, or to extend the duration of any warranties beyond the time period described herein on behalf of Sharp.

The warranties described herein shall be the sole and exclusive warranties granted by Sharp and shall be the sole and exclusive remedy available to the purchaser. Correction of defects, in the manner and for the period of time described herein, shall constitute complete fulfillment of all liabilities and responsibilities of Sharp to the purchaser with respect to the Product, and shall constitute full satisfaction of all claims, whether based on contract, negligence, strict liability or otherwise. In no event shall Sharp be liable, or in any way responsible, for any damages or defects in the Product which were caused by repairs or attempted repairs performed by anyone other than an authorized servicer. Nor shall Sharp be liable or in any way responsible for any incidental or consequential economic or property damage. Some states do not allow limits on warranties or on remedies for breach in certain transactions; in such states, the limits herein may not apply.

#### **Model Specific Section**

| Your Product Model Number & Description: | AL-2050CS Digital Multifunctional System<br>(Be sure to have this information available when you need<br>service for your Product.)   |
|--|---|
| Warranty Period for this Product:        | One (1) year on parts and one (1) year on labor from date of<br>purchase, except for the toner/developer cartridge and drum<br>cartridge supplied with the Product, which are warranted for a<br>period of fifteen (15) days from date of purchase. Disk media<br>supplied with the Product is warranted for replacement only<br>and limited to ninety (90) days from date of purchase. |
| Additional Item(s) Excluded from         | The warranty does not apply to defects or damage resulting  |
| <u>Warranty Coverage (if any):</u>       | from improper or inadequate maintenance by the purchaser<br>(see Operation Manual) or the use of non-genuine Sharp<br>toner/developer and drum cartridges.  |
| Where to Obtain Service:                 | Service is available in the United States from Sharp.   |
| <u>What to do to Obtain Service:</u>     | Call Sharp at 1-630-378-3590 to obtain a Return<br>Authorization Number and shipping instructions. A<br>technician will work with you on the phone and verify that<br>your Product needs service. Be sure to have Proof of<br>Purchase available.   |

Congratulations on your SHARP copier purchase. Call **1-877-RU-SHARP** (1-877-787-4277) for more information or to order PROTECTION PLANS, SUPPLIES, or ACCESSORIES.

# THE SHARP PROTECTION PLAN:

By purchasing an extended service plan from SHARP today, you can protect your investment after the factory warranty has expired. Choose from a one, two, or three year warranty extension and you will receive:

- Professional service from SHARP trained and authorized technicians
- All labor and parts required to complete repair; no deductible or hidden charges
- Transferability of coverage
- Peace of mind knowing that your investment is protected by a SHARP extended warranty.

Call 1-877-RU-SHARP (1-877-787-4277) for more information or to order PROTECTION PLANS, SUPPLIES, or ACCESSORIES.

To register your product and purchase accessories or supplies, you may also visit us at **www.sharpusa.com**.

|                                      |                                     |                               |                                       |  |

carcinogen). This classification is given to chemicals for which there is inadequate human evidence, but sufficient animal evidence on which to base an opinion of carcinogenicity. The classification is based upon the development of lung tumors in rats receiving chronic inhalation exposures to free carbon black at levels that induce particle overload of the lung. Studies performed in animal models other than rats did not show any association between carbon black

| Stability                        | : Stable  |
|----------------------------------|---|
| Hazardous Reactions              | : Dust explosion, like most finely divided organic powders. |
| Conditions to Avoid              | : Electric discharge, throwing into fire.                   |
| Materials to Avoid               | : Oxidizing Materials                                       |
| Hazardous Decomposition Products | : CO, CO <sub>2</sub> and NO <sub>x</sub>                   |
| Further Information              | : None  |

#### **11.TOXICOLOGICAL INFORMATION**

| Acute Toxicity  |  |
|-----------------|--|
| Ingestion(oral) | : LD <sub>50</sub> > 2000mg/kg (Rats)  |
| Inhalation      | : LC <sub>50</sub> >5.14mg/L (Rats)  |
| Eye irritation  | : Not an irritant (Rabbits)  |
| Skin irritation | : Not an irritant (Rabbits)  |
| Skin sensitizer | : No sensitization   |
| Mutagenicity    | : Negative(Ames Test).   |
| Carcinogenicity | : In 1996 the IARC reevaluated carbon black as a Group 2B carcinogen (possible human carcinogen). This classification is given to chemicals for which there is inadequate human evidence, but sufficient animal evidence on which to base an opinion of carcinogenicity. The classification is based upon the development of lung tumors in rats receiving chronic inhalation exposures to free carbon black at levels that induce particle overload of the lung. Studies performed in animal models other than rats did not show any association between carbon black and lung tumors. Moreover, a two-year cancer bioassay using a typical toner preparation containing carbon black demonstrated no association between toner exposure and tumor development in rats. |

Page : 4/4

Date Revised : Mar . 1. 2007 Date Issued : Sep . 1. 2003 MSDS No. F-31231

Chronic Effect : In a study in rats of chronic inhalation exposure to a typical toner, a mild to moderate degree of lung fibrosis was observed in 92% of the rats in the high concentration (16mg/m<sup>3</sup>) exposure group, and a minimal to mild degree of fibrosis was noted in 22% of the animals in the middle (4mg/m<sup>3</sup>) exposure group, but no pulmonary change was reported in the lowest (1mg/m<sup>3</sup>) exposure group, the most relevant level to potential human exposures.

#### 12. ECOLOGICAL INFORMATION

No data are available.

#### 13.DISPOSAL CONSIDERATIONS

| Waste from Residues    | : Waste material may be dumped or incinerated under conditions which meet all federal, state and local environmental regulations. |
|------------------------|---|
| Contaminated Packaging | : Waste may be disposed or incinerated under conditions which meet all federal, state<br>and local environmental regulations.     |

#### 14.TRANSPORT INFORMATION

UN Classification : None Not classified as hazardous for transport.

#### **15.REGULATORY INFORMATION**

US Information TSCA(Toxic Substances Control Act) :

All chemical substances in this product comply with all applicable rules or order under TSCA.

SARA(Superfund Amendments and Reauthorization Act) Title III

# For users in the USA

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

#### WARNING:

FCC Regulations state that any unauthorized changes or modifications to this equipment not expressly approved by the manufacturer could void the user's authority to operate this equipment.

Note:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions. may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
  - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
